1. A. Yes **v** is an eigenvector of A. The eigenvalue is $\lambda =$ 2

2. $\begin{bmatrix} 1 \\ 0 \end{bmatrix}$

$\begin{bmatrix} 1 \\ 1 \end{bmatrix}$

3. C.
One eigenvalue of A is $\lambda = 0$. This is because the columns of A are linearly dependent, so the matrix is not invertible.

4. C.
If $A\mathbf{x} = \lambda\mathbf{x}$ for some $\mathbf{x} \neq \mathbf{0}$, then $\mathbf{0}\mathbf{x} = A^2\mathbf{x} = A(A\mathbf{x}) = A(\lambda\mathbf{x}) = \lambda A\mathbf{x} = \lambda^2\mathbf{x} = \mathbf{0}$. Since $\mathbf{x}$ is nonzero, λ must be zero. Thus each eigenvalue of A is zero.

7 B. The statement is false. A diagonalizable matrix must have n linearly independent eigenvectors.

B
The statement is false. A diagonalizable matrix can have fewer than n eigenvalues and still have n linearly independent eigenvectors.

D
The statement is true. Let **v** be a nonzero column in P and let λ be the corresponding diagonal element in D. Then $AP = PD$ implies that $A\mathbf{v} = \lambda\mathbf{v}$, which means that **v** is an eigenvector of A

B.
The statement is false. An invertible matrix may have fewer than n linearly independent eigenvectors, making it not diagonalizable.

- As notes a while ago, kernel.org suffered a security breach. Because of this we have taken the time to re-architect the site into a model to improve our systems for developers and users of kernel.org. To this end we would like all developers who previously had access to kernel.org who wish to regain access to the host the git and cvs trees to follow the instructions here.

  Right now www.kernel.org and git.kernel.org have been brought back online. All developer git trees have been removed from git.kernel.org and will be added back as the relevant developers regain access to the system.

  Thanks to all for your patience and understanding during our outage and please bear with us as we re-examine different kernel.org systems over the next few weeks. We will be writing up a paper on the incident in the future.

- On Aug 25 2011 Happy 20th Birthday Linux!
  For everyone who doesn't know, on this day 20 years ago a Helsinki Finland student named Linus Torvalds announced the start of his hobby OS project with everyone. This original e-mail can be found here:
  Into the past as they say. It's history!

- On June 8, 2011 starting at midnight UTC the Linux Kernel Archives will participate in World IPv6 Day. We will enable IPv6 on as many of our services as possible. What does this mean? That the git.kernel.org host address (see below) will be removed.

- May 17, 2011 *For testing purposes only* we now have an IPv6 site at **hop.ifjpv6.kernel.org**. **This is a temporary name, and will go away on June 8, 2011**. Support for services and http, ftp, rsync, and git.

- April 1, 2011 Kernel.org would like to officially announce our long awaited Linux Infrastructure. Since its inception we've seen corporate takeovers, catastrophic failure of our systems, and have accurately and quietly run a full and reliable infrastructure. Today we have decided to bring it all to the light and announce to the security through obscurity.

  Kernel.org would like to Officially announce Kernel.org Skynet.

  As a first such unveiling of such a huge infrastructure I would also like to announce the cancellation of Google to help support Skynet, the purchase of a set of gifts to keep kernel.org in the black financially, making its net worth totally undetermined. For the details see our in the Skynet website.

- Nov 8, 2010: We would like to announce that we have completed some fairly major system upgrades to several pieces of our infrastructure. These upgrades were made possible by the generosity of both Google and HP. These additions add two new machines to the infrastructure and replace two aging machines that have served us quite well over the years.

  On the replacement front we have replaced mirror1 and mirrors2. The US based mirror machines with two new machines:

  - Mirror1.kernel.org is an HP DL380 G7 with dual Quad Core E5640 Xeon CPUs, 144G of RAM and 6 x 300G 10K RPM 2.5in drives
  - Mirrors2.kernel.org is a new HP DL380 G6 with dual Quad Core X5550 Xeon CPUs, 144G of RAM and 6 x 300G 10K RPM 2.5 in drives

  UPDATE: Because I've gotten so many e-mails on this, no the 6G drives is not a typo we have two HP MSA70 chassis attached to each machine. Giving us 25 per chassis and 16 on the head node meaning 25 + 25 + 16 = 66.

  On the new machine front we have acquired two machines both based out of the US at OSUOSL:

  - Demo.kernel.org We have acquired a machine to run in parallel with our existing dynamic web machine, which handles all of the logins, the wiki, cgit, and git.kernel.org. The new machine is an HP HP DL380 G6 with dual Quad Core X5550 Xeon CPUs, 32G of Ram and 8 x 300G 10K RPM 2.5in drives
  - Master1.kernel.org We have acquired a machine to run as a live backup to our master1 backend machine, which will happen if/when we will replace the current master backend machine with the new hardware, and the current master backend machine will become a

In attention to testing

My name is Jason, Iâ€™m working for a web development company and I m also into freelancing projects mainly based on search engine optimization and online reputation..
While I was looking for one of my clients profile online I have noticed that you could use some help managing your online presence

The online reviews have a direct and measurable impact on your practice. in fact, 97% of internet users are researching the web before making decisions If they see anything negative - true or not (unethical competition, slander or hateful) - they will go elsewhere.

While there are many companies offering alerts for the negative reviews almost none of them are actually offering a solution for the problem!â€

I can assist you in managing the negative reviews (unethical competition slander or hateful ote) maintain a positive feedback, creating an active defense against any misleading reviews that will eventually come and make sure that people will notice your practice and not your competition.â€

Reviews are simply too important to ignore, especially when bad reviews(unethical competition slander or hateful, inaccurate or misleading) cost you real money

Even if you are not really interested or you donâ€™t care about the online image feel free to ask for a free online presence report or more information

Form W-4 (2016)

Purpose. Complete Form W-4 so that your employer can withhold the correct federal income tax from your pay. Consider completing a new Form W-4 each year and when your personal or financial situation changes.

Exemption from withholding. You may claim exemption only if you meet both of the following conditions: you had no tax liability in 2015 and you expect no tax liability in 2016. You had no tax liability if your total tax was zero. You expect no tax liability if you expect your total tax to be zero. Your exemption is good for one year only. It expires February 16, 2017. See Pub. 505, Tax Withholding and Estimated Tax.

Note: If another person can claim you as a dependent on his or her tax return, you cannot claim exemption from withholding if your income other than earned income (for example, interest and dividends) exceeds $1,050.

Exception. An employee may be able to claim exemption from withholding even if the employee is a dependent, if the employee:

- Is blind, or
- Will claim adjustments to income; tax credits; or itemized deductions, on his or her tax return.

Basic instructions. If you are not exempt, complete the Personal Allowances Worksheet below. The worksheets on page 2 further adjust your withholding allowances based on itemized deductions, certain credits, adjustments to income, or two-earner/two-job situations.

Complete a worksheet that apply. However, you may claim fewer (or zero) allowances. For married couples, both spouses must complete separate worksheets. You can claim the same allowances, or you can claim them all on one worksheet. You may claim additional allowances or request additional withholding to avoid a year-end tax bill. See Pub. 505 for details.

Head of household. Generally, you can claim head of household filing status on your tax return only if you are unmarried and pay more than 50% of the cost of keeping up a home for yourself and your dependent(s) or other qualifying individual. See Pub. 501 (Exemptions, Standard Deduction, and Filing Information), for information.

Tax credits. You can take projected tax credits into account in figuring your allowances. Projected tax credits include the earned income credit, the additional child tax credit, the credit for child and dependent care expenses, the education credits, and the retirement savings contributions credit. See Pub. 505 for information on projecting your credits and withholding adjustments.

Nonwage income. If you have a large amount of nonwage income, such as interest or dividends, consider making estimated tax payments using Form 1040-ES, Estimated Tax for Individuals. Otherwise, you may owe additional tax. If you have pension or annuity income, see Pub. 505 to find out if you should adjust your withholding on Form W-4 or W-4P.

Two earners or multiple jobs. If you have a working spouse or more than one job, figure the total number of allowances you are entitled to claim on all jobs using worksheets from only one Form W-4. Your withholding will usually be most accurate when all allowances are claimed on the Form W-4 for the highest paying job and zero allowances are claimed on the others. See Pub. 505 for details.

Nonresident alien. If you are a nonresident alien, see Notice 1392, Supplemental Form W-4 Instructions for Nonresident Aliens, before completing this form.

Check your withholding. After your Form W-4 takes effect, use Pub. 505 to see how the amount you are having withheld compares to your projected total tax for 2016. See Pub. 505, 1040ES, or 1040NR-ES if you owe more than $1,000 on line 64, page 2, of Form 1040; or Form 1040A, line 42; or Form 1040EZ, line 10.

Future developments. Information about any future developments affecting Form W-4 (such as legislation enacted after we release it) will be posted at www.irs.gov/w4.

- If neither of the above situations applies, stop here and enter the number from line H on line 5 of Form W-4 below.

By the President of the United States of America

A Proclamation.

The year that is drawing towards its close, has been filled with the blessings of fruitful fields and healthful skies. To these bounties, which are so constantly enjoyed that we are prone, to forget the source from which they come, others have been added, which are of so extraordinary a nature that they cannot fail to penetrate and soften even the heart which is habitually insensible to the ever watchful providence of Almighty God. In the midst of a civil war of unequaled magnitude and severity which has sometimes seemed to invite foreign States to make unto us provoke their aggression, peace has been preserved with all nations, order has been maintained, the laws have been respected and obeyed, and harmony has prevailed everywhere except in the theatre of military conflict, while that theatre has been greatly contracted by the advancing armies and navies of the Union. Needful diversions of wealth and of strength from the fields of peaceful industry to the national defense, have not arrested the plough, the shuttle or the ship; the axe has enlarged the borders of our settlements and the mines as well of iron and coal as of the precious metals, have yielded even more abundantly than heretofore. Population has steadily increased,

Notwithstanding the waste that has been made in the camp, the siege and the battle-field, and the

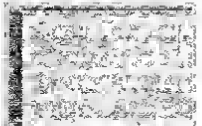
iCalendar

From Wikipedia, the free encyclopedia

iCalendar is a computer file format which allows Internet users to send meeting requests and tasks to other Internet users, via email, or sharing files with an extension of ".ics". Recipients of the iCalendar data file (with supporting software, such as an email client or calendar application) can respond to the sender easily, or counter propose another meeting date/time.[1]

iCalendar	
Filename extension	.ifb, .ics, .vcs
Internet media type	text/calendar
Type of format	Calendar data exchange
Standard(s)	RFC 5545

iCalendar is used and supported by a large number of products, including Google Calendar, Apple iCal,[2] GoDaddy Online Group Calendar,[3] IBM Lotus Notes,[4] Yahoo! Calendar, Evolution (software), KeepandShare (http://www.keepandshare.com), Lightning extension for Mozilla Thunderbird and SeaMonkey, and partially by Microsoft Outlook.



iCalendar components and their properties

iCalendar is designed to be independent of the transport protocol. For example, certain events can be sent by traditional email or whole calendar files can be shared and edited by using a WebDav server or SyncML. Simple web servers (using just the HTTP protocol) are often used to distribute iCalendar data about an event and to publish busy times of an individual. Public access and edit of iCalendar data in web pages using hCalendar, a 1:1 microformat representation of iCalendar in semantic (X)HTML.

Prayer to St. Joseph over 1900 years old

O St. Joseph whose protection is so great, so strong, so prompt before the Throne of God, I place in you all my interests and desires. O St. Joseph do assist me by your powerful intercession and obtain for me from your Divine Son all spiritual blessings through Jesus Christ, Our Lord; so that having engaged here below your Heavenly power I may offer my Thanksgiving and Homage to the most Loving of Fathers. O St. Joseph, I never weary contemplating you and Jesus asleep in your arms. I dare not approach while He reposes near your heart. Press him in my name and kiss His fine Head for me, and ask Him to return the Kiss when I draw my dying breath. St. Joseph, Patron of departing souls, pray for us. Amen

Say for nine consecutive mornings for anything you may desire. It has seldom been known to fail.

This prayer was found in the fiftieth year of Our Lord Jesus Christ. In 1500's it was sent by the Pope to Emperor Charles when he was going into battle.

Whoever reads this prayer or hears it or carries it, will never die a sudden death, nor be drowned, nor will poison take effect on them. They will not fall into the hands of the enemy nor be burned in any fire, nor will they be defeated in battle.

Make this prayer known everywhere.

Bishop of Trenton

Find Call Route For A Given Number on an Avaya Definity

Submitted by [illegible] on Sat, 05/28/2005 - 22:00

If you're at a site with a private switch with multiple TIEs, each connected with a second tier, for example, only a few digits from a phone to have one used for local calls and one for long-distance calls. To see the route that the call will take, log on the switch, you can run a couple commands, and get a great deal of information.

For our example, let's try to find the path for 1 408 555 1263.

Run the ars route-chosen 14085551263

The resulting output would be:

ARS ROUTE CHOSEN REPORT
Location: 1 Partitioned Group Number: 1
Dialed String: Total Route Call Node:
Step Min Max Pattern Type Number Location:
[4 11 1 3 Unrestricted

The above report tells us that this call will use the "Route Pattern 3". Now we want to look at what Route Pattern 3 defines.

Topics for Second Paper in History 351

Choose one of the following topics and, using only your assigned readings, handouts, and classroom lectures and discussions, write a well-rounded essay of 4 to 6 double-spaced typed pages (ca. 800-1500 words) about it. Be sure to back up your own opinion with well chosen examples from readings, lectures, or discussions.

Be especially sure to avoid plagiarism, which is academic dishonesty and an honor code violation. Using the writings of others without quotation marks and attribution is plagiarism. Too close a paraphrase also is plagiarism. Be sure to thorough recast sentence structure and any distinctive phrases in the sources you use or quote the section (using footnotes, endnotes, or parenthetical references). If you have questions or problems, please contact your instructor.

This paper is due on **Wednesday, Nov. 14.** Unexcused late papers will lose points.

1. Some historians have argued that while the family as the most important institution in southern life, protected southern white women, it hampered the freedom of southern white men. Discuss the importance of the family to the white southerners depicted in your readings. To what extent do families enable men's achievements and to what do they limit men's actions in the community? Be sure to use Edward Isham as an example.

2. Historians such as Suzanne Lebsock have been interested in the extent to which southern women's access to property gave them freedom and autonomy. Looking at southern women of different classes and races, evaluate how much freedom they had in the household, in general decision making, and in their sexual behavior, and decide whether property owning made a difference in this respect.

Test your fax machine without bothering friends
By Adam
Created Oct 16 2006 - 12:27pm

I found this site today [1] while trying to see if a fax machine was working correctly. It is always tough testing a fax because you have to have a friend who is home with a fax, and willing to help. Thanks to a commenter, you can try this test fax service from HP as well. [2]

This site lets you enter a fax number and, in a few minutes, you will receive a test fax.

If this helped, consider buying me a beer or an Americano! [3]

Test

It sounds as though it rolled off the tongue of Mike Lange but it's really the punchline to a joke uttered by the Pittsburgh Penguins' first coach, Red Sullivan.

Sullivan hated the proposed black and white colors and "Penguins" nickname for Pittsburgh's NHL expansion team.

According to Pittsburgh freelance artist Bob Grassner the famous Sullivan quote went as follows: The day after we play a bad game, the sportswriters say I say 'They skated like a bunch of nuns.

The team was named February 10, 1967 after more than 25,000 entries from a newspaper contest were fielded.

The Penguins would play home games at the Civic Arena, or "The Igloo," and the nickname seemed like a natural alliance to Carol McGregor the wife of Penguins' owner, Sen. Jack McGregor.

Grassner had a disdain for the new team name, too. He favored the adoption of the Hornets nickname used by the Pittsburgh's AHL team.

"The Penguins? No, really what will the team be called?" quizzed Grassner upon first hearing the name "You can't call a hockey team the Penguins. That's ridiculous."

Jerseys. Before them, it was used on the official pucks and team stationery

The first jerseys used a simple diagonal "PITTSBURGH" lettering scheme that was favored by Coach Kelly, a former teammate of the New York Rangers whose jerseys still feature drop-shadow diagonal lettering.

• Grassner designed the University of Pittsburgh's script "Pitt" logo first used on their football helmets in 1973. Grassner also drew the "free jolly pirate" emblem used by the city's baseball team from 1968 to 1986

Grassner LEFT made those remarks while he was being interviewed for the job to create the first official team logo. Not exactly a great first impression.

Grassner then 34 years old, was not afraid to admit his partiality to the Hornets because they had a logo he knew and loved.

No kidding. – Grassner had also designed the Hornets crest

After studying at the Art Institute of Pittsburgh, Duquesne University and the University of Pittsburgh, Grassner spent a stint in North Korea with the U.S. Army before returning to Pittsburgh to begin his freelance artist career

TESTING

1... 2... 3

29.4.1 FORCE_ALERT Message (Function Code 0x0409)

Command Class = 0x00	Command Type = 0x09	Function Code = 0x0409
Configuration Device Level	Not applicable (blank)	FORCE_ALERT

The FORCE_ALERT command generates an alert / error condition in the device. This can be useful for testing Host error condition handling, and also in preparation for a Core Dump when the device did not issue a fault alert message.

The FORCE_ALERT command can be used to generate a "bus_alert" that will flush the ARM caches, and also save important working data that would otherwise be lost during the Core dump process (that is, device RESET) when using CRAM_ENCAPS format.

The command takes a single 16 bit parameter which specifies the Alert Type generated by the device. When prepared for a Core Dump, it is recommended to use Alert Type 0x0004 which generates a data abort. (Alert Types are described in the Section 29.4.1 Alert Diagnostic Indication Format, on page 382.)

Parameter 1 (TFTD Word 4) Alert Type to be generated

TFTD Word	Description
4	0x0 - Set Alert type in the same word Alert Type 0x0004 - Data Abort (recommended for software)

29.5 Diagnostic Output Paths

Diagnostic messages and responses can be written to External Bus MMF Device, and the Host using the Parallel Interface or the RMII Ethernet Interface (using Open Diag utility and CRAM_ENCAPS).

Oper Diag must have the ability to be redirected to a different output. Real-time can reduce the load that is then to recognize, store and capture debug information when needed. With redirection, the diagnostics can be sent over to Ethernet (for instance) where the debug information can be automatically routed to a designated sniffer.

- Path 1: REDIRECT OVER CRAM_ENCAPS or REDIRECT OVER IP/UDP
- Path 2: PCI/PF

29.5.1 Sequence for Configuring Unified Diagnostic Commands Example

- SET_TDM_PARAMS – Device Level Configurations first.
- SET_ETH_HDR_DEVICE – MAC Device Source MAC Address.
- IP_SERVICE_CFG – required before SET_IP_HDR command.
- IP_ADDRESS – MGW Device Source IP Address.
- ARP_SERVICE_CONFIG – option for Host
- NIF_SELECT – NIF of Ethernet interface to which Oper Diags will be redirected.
- REDIRECT_OVER_CRAM_ENCAPS or REDIRECT_OVER_IP/UDP
- SUPVSN_CREATE_CHANNEL

After the SUPVSN_CREATE_CHANNEL command, the "Enable diag" commands can be issued before or after creating Voice (VOPENA) on a specific channel. If traces are required from the beginning of a voice call, the "Enable diag" command must be sent before creating voice on a specific channel.

Timely Access to Non-Emergency Health Care Services

Sometimes it's difficult to know what kind of care you need. Your doctor or a nurse will be available to assist you by phone 24 hours a day, seven days a week. This is known as "triage." Here are some of the ways that triage can help you:

- They can answer your questions about a health concern and instruct you on self-care at home if appropriate.
- They can advise you about whether you should get medical care and how and where to get care. For example, if you are not sure whether your condition is an Emergency Medical Condition, they can help you decide whether you need Emergency Health Care Services or Urgent Care and how and where to get that care.
- They can tell you what to do if you need care and your provider's office is closed.

HPSM providers will make sure that you speak with a doctor or nurse over the phone within a time period that is appropriate for your medical condition. The waiting time to receive a return call from a doctor or nurse will not be longer than 30 minutes.

HPSM will make sure that all contracted health providers also have an answering service or answering machine available during non-business hours that can provide information regarding how to seek urgent or emergency service.

Please contact your PCP at the number on your HPSM Member ID Card to use telephone triage or screening services, 24 hours a day, 7 days a week.

If you have any questions, please call HPSM **Member Services** at **1-800-750-4776** Monday through Thursday **8:00 a.m.** to **5:00 p.m.** and Friday **9:30 a.m.** to **5:00 p.m.**

TTY users may call **1-800-735-2929** (California Relay Service) or dial **7-1-1**.

Emina (sevdalinka)

Sa Wikipedije, slobodne enciklopedije

Emina je sevdalinka nastala na tekst mostarskog poete Aleksa Šantića koja je napisao pod utiskom ljepote Mostarke Emme efic udata Koluder Po predanju, stihove "Umro stari pjesnik umrla Emina ostala je pusta bašča od jazmina. Salomljen je ibrik uvelo je cvijeće pjesma o Emini nikad umrijet neće" koji su dodani izvornom Šantićevom tekstu, izrekla je Sevda Kattica, usmeni kazivač narodnih pjesama kada joj je Himzo Polovina donio vijest o smrti opjevane Emine Pjesmu su mnogi interpretirali sa dodatkom Sevdinih stihova, dok su je Himzo Polovina i ibrica Jasić kao takvu snimili na nosače zvuka.

Tekst [uredi]

Sinoć kad se vraćah iz topla hamama,
prođoh pokraj bašče vuroga imama.
Kad tamo u bašči, u hladu jasmina
s ibrikom u ruci stajaše Emina.

Ja takva je pusta! Tako mi imana,
stid je ne bi bilo da je kod sultana.
Pa još kada šeće i plećima kreće
ni hodžin mi zapis više pomoć' neće!

Je joj nazvah selam. Al' moga mi dina,
ne šće ni da čuje ljepa Emina
već u srebrn ibrik zahvatila vode
pa niz bašču dule zaljevati ode

S grana vjetar puhnu, pa niz pleći pusti
rasplete joj njene plavetne gusle
Zamrsi kosa, k'o sumbuli plavi,
a meni se kremi buruet u glavi!

Malo ne povrnuh, mojega mi dina,
al' meni ne dođe ljepa Emina.
Samo me je jednom pogledala mrko,

Judge to the court, at the start of a case: "I have to declare an interest in this case. Last week, the plaintiff sent me a check for $10,000 to find in his favor."

Two days later: I received $20,000 from the defendant to find in his favor.
I have therefore sent $10,000 back to the defendant and can try the case without bias."

A woman goes to the local psychic in hopes of contacting her dearly departed grandmother. The psychic's eyelids begin fluttering, her voice begins warbling, her hands float up above the table, and she begins moaning.
Eventually, a coherent voice emanates, saying, "Granddaughter? Are you there?"

The customer, wide-eyed and on the edge of her seat, responds, "Grandmother? Is that you?"
"Yes granddaughter, it's me."

"It's really, really you, grandmother?" the woman repeats.
"Yes, it's really me, granddaughter."

The woman looks puzzled, "You're sure it's you, grandmother?"
"Yes, granddaughter. I'm sure it's me."

The woman pauses a moment, "Grandmother, I have just one question for you,"
"Anything, my child."

"Grandmother, when did you learn to speak English?"

Re Patient ?
Notes for Appointment on Mon Aug 18 2014

REMINDER Patient is severely allergic to Sulfa drugs (Stevens-Johnson Syndrome)

Primary Goals for Appointment

1. Patient requires a new (and more effective) arthritis pain prescription
   - Pharmacy has informed patient that current medication "PMS DIAPHARM NAPROXEN 125MG 5ML SUSP (DIN 02162431)" is no longer available. She received the last available bottle on 2014-Jul-31
   - Input for new prescription
     - Patient has experienced an increase in pain and a decrease in mobility over the last several years (great difficulty with shoes, socks, no longer can walk to local convenience store with walker will not travel to any family functions any more – including recent baby shower for first great grandchild, weddings, etc.)
     - Patient may ask to continue with liquid medication. Please disregard and prescribe the most suitable and effective medication in any form to provide the most relief
     - Patient may claim they cannot swallow pills. Please disregard as patient has other prescriptions in pill form.
2. To re-establish regular family doctor visits
   - Patient has become increasingly resistant to medical appointments.
   - Is limiting auto-renewal of existing prescriptions to require doctor appointment an option to aid with this goal?

Other concerns to be addressed at future appointments but provided here in case they are relevant to the above:

- Current prescription review
- Nutrition
- Claustrophobia
- Anxiety
- Urinary incontinence – ongoing for years

Thank you.

How Can I Test My Fax Machine?

I just hooked up a new fax machine, and I'd like to test it, just to make sure it works. How can I do that?

Presumably you want to test your fax machine, by sending a fax from it and receiving a fax with it. Here's how to do both.

To test the send functionality of your fax machine, send a one-page fax to 1-855-930-1239 (a toll-free number in the United States.) When it's finished transmitting, point your web browser to Fax Toy — it's a fun web site that displays whatever is faxed to that number. Within a minute, your fax should appear on the site. Click the thumbnail to see a large version.

To test the receive functionality of your fax machine, point your web browser to FaxZero — this site lets you send faxes for free to anywhere in the United States and Canada. Within a few minutes, your fax machine should ring — hopefully it will automatically answer and spit out the test fax.

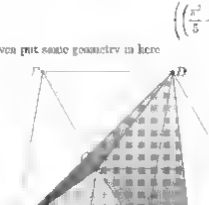
Mm look at this fancy LaTeXnonsense. This is the good times. I can do all the math I want and nobody can stop me. I can just put an α or a δ or even $\left(\pi\left(\frac{x^n}{x+1} - \frac{1}{x}\right)\right)^2$ right in the middle of the text and you can't stop me. I'll even do it again $\left(\frac{1}{4} + \frac{5}{7}\right)^2 \pi^2$.

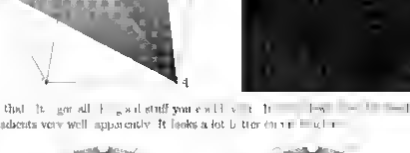
You want a fax number? I'll give it to you. I don't care

$$\left(\left(\frac{\pi^2}{5} + \phi\right)^4 - 1\right)^{\ln 6 - \kappa} \qquad (2)$$

I'll even put some geometry in here



Enjoy this. It's got all the good stuff you could want. It knows how to handle gradients very well, apparently. It looks a lot better on my machine.



Man, that is not gonna turn out well after the fax.

How Can I Test My Fax Machine?

I just hooked up a new fax machine and I'd like to test it, just to make sure it's works. How can I do that?

Presumably you want to test your fax machine by sending a fax from it and receiving a fax with it. Here's how to do both:

To test the send functionality of your fax machine, send a one page fax to 1 855 330 1239 (a toll free number in the United States.) When it's finished transmitting, point your web browser to fax.zan — it's a fun web site that displays whatever is faxed to that number. Within a minute, your fax should appear on the site. Click the thumbnail to see a large version.

To test the receive functionality of your fax machine, point your web browser to FaxZanu, then use how you send faxes for free to anywhere in the United States and Canada. Within a few minutes, your fax machine should ring — hopefully it will automatically answer and spit out the test fax.

That's easy to do at nine Fax Machines.

What This Cardholder Agreement Covers

This Agreement sets out the terms under which you may use your RBC Royal Bank Credit Card, it replaces all previous RBC Royal Bank Visa Charger or MasterCard® Agreements and applies if we send you a renewal or replacement Credit Card. This Agreement also covers RBC Royal Bank Credit Card Cheques and your RBC Royal Bank credit card Account.

When this Agreement refers to "you" or "your" it includes each person who signed or submitted the Credit Card Application, whose name is on the Account or to whom a Credit Card on the Account has been issued (each Credit Card issued to the Account will have its own unique card number) plus an Authorized User. If the Account has more than one person, "you" means each one of you, all together, individually and in any combination.

Signed by this Agreement. This means that each of you is fully responsible, jointly and severally, on the Account, for the use of which one of you incurred or which Credit Card was used by your any particular person. The amounts for which you are responsible includes any amounts that may have been owing on your Account at the time your Credit Card is issued.

"You" and "your" do not include Authorized Users unless otherwise indicated. An "Authorized User" is a person who we have issued a Credit Card on your Account at your request. The terms under which we will issue a Credit Card to an Authorized User are set out in the "Authorized Users" section of this Agreement. While your Authorized Users will have the same ability to make purchases on your Account as you do, you will be responsible for all amounts owing on your Account, including those incurred by Authorized Users. You are responsible for ensuring that all of your Authorized Users comply with the applicable terms and conditions of this Agreement.

If you allow someone else (including an Authorized User) to use your Credit Card or your Account number you will be liable for any charges incurred by that person even though that person may have exceeded your authorization in a particular way. Also, your protections when you receive a problem under RBC® Interac Royal Bank of Canada and MasterCard® Agreement policy apply to "we", "our" or "us" in this Agreement.

This Agreement is your promise to pay amounts owing on your Account. You should read it carefully as it explains your rights and duties. The signature, activation or use of a Credit Card or any Account number by you or any Authorized User means that you have received and read this Agreement and agree to and accept all of its terms.

By accepting this Agreement you have requested the benefits and services provided in connection with Credit Cards. Different types of Credit Cards come with different features. Some of those features are described in a separate letter in this Agreement. The services you receive with your Credit Card outlines the benefits and services which you and may be changed from time to time at any time.

Third parties will provide some of the benefits and services outlined in your separate letter. Those third parties, and not us, are responsible to you for the services and benefits offered or provided by them.

Optional features are available at no additional cost to you. If you request any of these optional features, we may send you a separate agreement containing any additional terms and conditions.

Your Choice of Language

When you apply for your Credit Card, you indicated whether you wanted us to communicate with you in English or French. We will respect your choice in our correspondence with you. If you would like a copy of this Agreement in the other language or would otherwise like to receive it in a different language, please let us know.

Your Rights and Duties as a Customer Using Your Credit Card

You can use your Credit Card and your Account number to pay for personal purposes including:

- paying for goods and services, whether you buy in person, over the phone, on the Internet or by mail order;
- making cash withdrawals at one of our branches, at another financial institution or at a banking machine (ATM) which handles this feature;
- getting cheques using the Credit Card Cheques we provide for this purpose;
- making advances of a balance transfer either by transferring all or part of a balance you owe elsewhere to your Account, through our online banking service or by calling our Credit Card Services Centre at 1 800 ROYAL-1-2-3 (1-800-769-2512).

A Credit Card issued on your Account may only be used and owned by the person (either you or an Authorized User) whose name is on that Credit Card. You may not use your Credit Card or Account number for any illegal or improper purpose. We also reserve the right to prevent your Credit Card or your Account from being used for certain types of transactions as determined by us, including transactions considered to involve gambling. When you or your Authorized Users use a Credit Card or your Account number in a transaction, we are lending you the amount of your and your Authorized User's purchase or cash advance, as the case may be, or "Cash Advance". We mean when you withdraw cash from your Account, use a Credit Card Cheque or make a balance transfer (cash-like transaction) or bill payment (that is not a pre-authorized charge that you set up with a merchant). You are liable to and must repay all amounts owing on your Account. The total you owe includes all purchases, Cash Advances, interest and fees. All of these amounts will be shown on your monthly statement.

Mail Order, Phone or Internet Sales

When you pay for goods or services using your Account number, Internet shopping your Credit Card, you authorize the same transaction as if you signed a sales slip. Credits arising from returns or adjustments are generally first applied to transactions of a similar type, charged at any interest rate then, and the remainder in other amounts and up to the same nature as we apply payments in accord of the Minimum Payment.

Your Credit Limit

Your initial or current credit limit applies in the Information Statement provided your Credit Card. This is the maximum amount which we allow you and your Authorized Users, taken together, to charge to your Account to cover purchases, Cash Advances, interest and fees.

As the charges on your Account increase, the amount of credit available for you to use will decrease. We calculate how much credit you have available by subtracting from your credit limit the amount you are using including the amount of any purchases we have authorized but not yet posted to your Account.

We may from time to time allow the amount you owe on or to your account to exceed your credit limit by authorizing transactions to be made on your credit limit. An Overlimit Fee will be charged to your Account when your New Balance on a monthly basis, multiple RBC Visa Infinite® Avion® RBC Infinite Privilege® Visa Infinite and RBC Visa Infinite Accounts are not charged an Overlimit Fee. We may, at any time, refuse to authorize transactions in excess of your credit limit and require you to pay any balances which exceed your credit limit.

Your monthly statement shows your current credit limit as well as your available credit. If you exceed your credit limit — or make an agreement of it — we may review your credit limit from time to time, at our discretion. You can tell us if you want your credit limit increased. We will not increase your credit limit without your express consent or do so. You may also request any time to review your eligibility for a Credit Limit Increase.

Some merchants require that purchases be pre-authorized. Your available credit will determine by the amount authorized, whether or not you receive goods or services at that time.

Determination of Interest

We have a minimum 21 day interest-free Grace Period for new purchases. Your new purchases for each month are shown on your statement which appear in the Activity Description of that month's statement you Current Statement. You can avoid interest on these new purchases by paying the New Balance in full on or before the Current Statement's Payment Due Date. Your New Balance is the total of your purchases, Cash Advances, interest and fees incurred up to the date your Current Statement was prepared.

If you do not pay your New Balance in full on or before the Current Statement's Payment Due Date, you must pay interest on each new purchase appearing on that statement from the transaction date until the date you pay the New Balance in full, unless you are entitled to a Grace Period. Your next monthly statement will include interest accrued on each of those new purchases from its transaction date to the date we prepare that next monthly statement.

We will continue to charge interest on the unpaid portion of those new purchases until the next time you pay the New Balance in full on or before its Payment Due Date. Interest related to your purchases could appear on the first statement you receive after we process that purchase. It is important that you not included in this New Balance you paid in full before it accrued interest between the date the monthly statement which showed that New Balance was prepared and the date you made your payment.

Fees are treated in the same manner as purchases for the purpose of charging interest. The transaction date for a fee or charge is the date the fee is posted to your Account. Cash Advances are treated differently from purchases and never benefit from an interest-free grace period — see "Cash Advance Interest".

We do not charge interest on interest.

The amount of interest we charge on your Current Statement is calculated as follows:

- We add the amount you owe each day and divide that total by the number of days in the statement period. This is your average daily balance.
- We multiply the average daily balance by the applicable daily interest rate(s) (determined by taking the annual interest rate(s) and dividing by the number of days in the year). We then multiply this value by the total number of days in the statement period to determine the interest we charge you.

When there is more than one applicable interest rate, we calculate your interest based on the average daily balances for each one.

Your Current Statement will show your New Balance, Payment Due Date, transaction and posting dates, and your interest rates, including any applicable introductory interest rates and corresponding interest rates.

Cash Advances

Interest is always charged on Cash Advances from the day the Cash Advance is made. Cash Advance Fees or Promotional Rate Fees also apply to certain Cash Advances, as set out in the "other fees" section of your Agreement.

All of the following types of transactions are treated as Cash Advances, and we charge interest from the transaction date:

- when you make a cash withdrawal from your Account in an RBC branch or ATM, or at any other financial institution's branch or ATM;
- when you use a Credit Card Cheque;
- when you take advantage of a balance transfer offer for transactions to all or part of

not a solitary one. And so is nursing care. Patient satisfaction arises from a joint effort by the various members of the healthcare team who MUST encourage each other to meet short and long term goals

3. **Limitation.** Cunningham's view regarding "solitude" may be a limitation when applied to nursing care. He states, "Solitude is a necessary component of community - a key ingredient in the relationships that constitutes community. Without solitude one runs the risk of conformism, unhealthy dependencies, a failure to discover and to respond to one's gift s, group illusions, mechanical relationships, an absence of mystery ... Yet solitude is not only a preparation for genuine community, it is an ongoing essential ingredient of any healthy community" (p 243)

Having to balance Cunningham's solitude with team playing and interdisciplinary care may be a limitation to nursing care. Multitasking between solitude and community responsibilities may limit nursing care

Re: Questions 1, 2, & 3 - Bernadeth Ongli (Mar 31, 2016 7:28 PM)

Hi Chidiebele,

I enjoyed reading your posting, also identified with desert image of spirituality. According to McGrath (2003), the interest in the desert or wilderness was developed into two different manner within third century eastern Christianity. Some abouse to take the image literally. Increasingly alarmed at the growing wealth and corruption of city life, withdrew into the desert to establish a new community concentrinted by the sins of the city. By withdrawing from human society into the desert, they believed that they would be able to address their own spiritual state with a degree of concentration which would be impossible elsewhere. A similar idea was found in the writings of Cassin (360-435), who initially entered a monastery in Bethlehem before settling down in Egypt. For Cassin, a desert was a place in which individuals could confront and deal with their sins.

McGrath, A.,E., (2003). Christian spirituality: An introduction. Blackwell publishing

Thanks

Bernadeth

Re: Questions 1, 2, & 3 - Chidiebele Obichi (Apr 4, 2016 10:26 PM)

Thank you Berna,

I agree that the desert can be taken literally whichever way it is a place and time of similar reflections and unique experiences. Anybody who separates themselves, be it in the monastery house, or even lifestyle does that for a good reason. This separation adds value to the lives of people who experience it.

Re: Questions 1, 2, & 3 - Christiana Asini (Mar 31, 2016 10:40 PM)

I agree with you that Cunningham spirituality is inclusive based on his various definitions of spirituality. He even gave an example of the 12 steps program to overcome alcoholism as a means of providing spiritual care. His themes of spiritual images from spiritual journey to Eucharist are all associated with spirituality and spiritual growth.

Selecting Wireless Network Settings From the Control Panel

You can select wireless network settings from the control panel.

The default setting is Infrastructure mode. Select Ad-hoc mode to connect to a computer with a wireless network adapter installed. Supported wireless devices include adapters.

Note: Depending on the type of the product you have purchased, some network settings may not be available. For example, if you have purchased a product that supports only 802.11b, the 802.11a settings will not be available.

1. Press the Home button if necessary.
2. Press the [redacted] button.
3. Press the Wireless Settings button.

4. Select Wireless Settings.

Note: Ensure that the wireless communication switch on your product is set to the ON position. Refer to your product's User's Guide for more information.

5. Select the name of your wireless network from the list and press OK.

Note: If the wireless network you want to connect to does not appear in the list, select Refresh to update the list. If the wireless network still does not appear in the list, select Ad-hoc Settings and configure the settings for the ad-hoc network.

6. Select the Password field and enter the network key (WEP key or WPA passphrase). Refer to your wireless router's manual for information about finding your network key.
7. Press the [redacted] button to enter the password. Select OK to confirm the password.
8. Select Save to save the network settings and connect to the network.

Note: If you want to change a setting, press the Back button.

9. If you want to specify a static network setting, press one of the Network Settings keys, select Static, and press OK.
10. Press the Home button to return to the Home screen. If you have changed the network settings, you may have to restart your computer for the changes to take effect.

Related to Teteoinnantag, Blue Christmas, Thursday of the Dead, Samhain, Hop-tu-Naa, Calan Gaeaf, Allantide, Day of the Dead, Reformation Day, All Saints' Day, Mischief Night(of vigils)

Helloween or **Hellowe'en** (a contraction of All Hallows' Evening)[1] also known as **Allhalloween**,[2] **All Hallows' Eve**,[3] or **All Saints' Eve**,[4] is a celebration observed in a number of countries on 31 October, the eve of the Western Christian feast of All Hallows' Day. It begins the three-day observance of Allhallowtide,[5] the time in the liturgical year dedicated to remembering the dead, including saints (hallows), martyrs, and all the faithful departed.[6]

It is widely believed that many Halloween traditions originated from Celtic harvest festivals which may have pagan roots, particularly the Gaelic festival Samhain, and that this festival was Christianized as Halloween.[7][8][9][10] Some academics, however, support the view that Halloween began independently as a solely Christian holy day.[11][12][13]

Halloween activities include trick-or-treating (or the related guising), attending Halloween costume parties, decorating, carving pumpkins into jack-o'-lanterns, lighting bonfires, apple bobbing and divination games, playing pranks, visiting haunted attractions, telling scary stories and watching horror films. In many parts of the world, the Christian religious observances of All Hallows' Eve, including attending church services and lighting candles on the graves of the dead, remain popular,[14][15] although elsewhere it is a more commercial and secular celebration.[16][17] Some Christians historically abstained from meat on All Hallows' Eve,[18][19] a tradition reflected in the eating of certain foods on this vigil day, including apples, potato pancakes and soul cakes.[20][21][22]

COOKING INSTRUCTIONS

Dry beans must be soaked before cooking.

Issue Message: I oppose HB 2748

Response: Dear Adrian Adrian

Thanks for sending me a Hotline Message expressing your opposition HB 2748 a bill concerning local taxation. I appreciate you taking time to contact me on this important issue.

As your State Senator I will work hard to find solutions to the $2.6 billion budget crisis. Washington State businesses and families are struggling to make ends meet while unemployment is growing higher. The last thing I want to do is raise taxes. Every proposed budget cut or tax increase will be carefully reviewed and discussed at least twice in the Senate. The process will be a long and difficult one. I don't expect the Legislature to approve a final budget until mid-March--at the earliest. We'll know more then.

Thanks again for the message. Please let me know whenever I can be of assistance.

Sincerely

Tracey Eide

Presumably, you want to test your fax machine by sending a fax from it and receiving a fax with it. Here's how to do both.

To test the send functionality of your fax machine, send a one-page fax to 1-888-877-1655 (a toll-free number in the United States.) When it's finished transmitting, point your web browser to Fax Toy — it's a fun web site that displays whatever is faxed to that number. Within a minute, your fax should appear on the site. Click the thumbnail to see a large version.

To test the receive functionality of your fax machine, point your web browser to FaxZero. this site lets you send faxes for free to anywhere in the United States and Canada. Within a few minutes, your fax machine should ring — hopefully, it will automatically answer and spit out the test fax.

At The Border Checkpoint

Five Englishmen in an Audi Quattro arrived at an Irish border checkpoint.

Paddy, the officer, stops them and tells them: "It is illegal to put five people in a Quattro. Quattro means four."

"Quattro is just the name of the automobile," the Englishman retorted disbelievingly. "Look at the papers: this car is designed to carry five persons."

"You cannot pull that one on me," replies Paddy. "Quattro means four. You have five people in your car and you are therefore breaking the law."

"You idiot!", the Englishmen replies angrily. "Call your supervisor over. I want to speak to someone with more intelligence!"

"Sorry," responds Paddy, "Murphy is busy with two guys in a Fiat Uno."

Flame Analysis Lab

Hardik Mittal, Period 4, 10/16/12

Alex P., Phuong N

Abstract:

Introduction:

The primary purpose of this lab was to observe the element's reaction to the flame with respect to its electron configuration. The electron configuration is the arrangement of electrons of an atom, molecule, or other physical structure. It concerns the way electrons can be distributed within orbitals. Before the element was introduced to the flame, it was in ground state. The ground state of an electron refers to the lowest energy state the electron can achieve. However, when a sample of the element was placed in the flame, the electrons entered the excited state. The excited state is simply a state in which the electron achieves a higher energy level (than the ground state) when energy is added (in this case, the heat from the flame). The secondary goal of this lab was to examine the wavelength of electromagnetic energy the element reflected (determined by the hue of the flame). The production of light resulted from each element's unique emission spectra. The emission spectra is the spectrum of electromagnetic radiation emitted by the atom's electrons when they are returned to a lower energy state. Therefore, when the electron reached the excited state (when under the flame) and then returned to its ground state, light formed. The absorption spectra is a spectrum of dark lines across the pattern of spectral colors produced when light (produced by the emission spectra) passes through a medium (the element) and the medium absorbs certain frequencies depending on the medium. The hue of the flame was formed by each element's unique absorption spectra depending on which wavelength of electromagnetic energy the element was unable to absorb. Each element has its own spectra (because each element has a different electron configuration and each absorbs and reflects different wavelengths of electromagnetic energy), thus there was a wide variety of flame colors. The atomic spectra has been used in both environmental science and forensics. In environmental science, the atomic spectra allows environmentalists to detect traces of metals in freshwater, soil, ocean, etc. This allows environmentalists to take action and cleanse the environment of metals. In forensics, the atomic spectra allows forensic specialists to detect the elements present on the crime scene, especially in a hit-and-run situation. For example, an element present in the majority of poisons is detected on the victim's corpse using the atomic spectra.

How Can I Test My Fax Machine?

I just hooked up a new fax machine, and I'd like to test it just to make sure it works. How can I do that?

Presumably you want to test your fax machine by sending a fax from it and receiving a fax with it. Here's how to do both.

To test the send functionality of your fax machine, send a one-page fax to 1-888-877-1655 (a toll-free number in the United States.) When it's finished transmitting, point your web browser to Fax Toy — it's a fun web site that displays whatever is faxed to that number. Within a minute, your fax should appear on the site. Click the thumbnail to see a large version.

To test the receive functionality of your fax machine, point your web browser to FaxZero, the site lets you send faxes for free to anywhere in the United States and Canada. Within a few minutes, your fax machine should ring — hopefully it will automatically answer and spit out the test fax.

An initial fraud alert stays in your file for at least 30 days. An extended alert stays in your file for seven years. To place either of these alerts, a consumer reporting agency will require you to provide appropriate proof of your identity, which may include your Social Security number. If you ask for an extended alert, you will have to provide an identity theft report. An identity theft report includes a copy of a report you have filed with a federal, state, or local law enforcement agency, and additional information a consumer reporting agency may require you to submit. For more detailed information about the identity theft report, visit www.consumer.gov/idtheft.

2. You have the right to free copies of the information in your file (your "file disclosure"). An initial fraud alert entitles you to a copy of all the information in your file at each of the three nationwide agencies, and an extended alert entitles you to two free file disclosures in a 12-month period following the placing of the alert. These additional disclosures may help you detect signs of fraud, for example, whether fraudulent accounts have been opened in your name or whether someone has requested a change in your address. Once a year, you also have the right to a free copy of the information in your file at any consumer reporting agency, if you believe it has inaccurate information due to fraud, such as identity theft. You also have the ability to obtain additional free file disclosures under the provisions of the FCRA. See www.ftc.gov/idtheft.
3. You have the right to obtain documents relating to fraudulent transactions made or accounts opened using your personal information. A creditor or other business must give you copies of applications and other business records relating to transactions and accounts that resulted from the theft of your identity if you ask for them in writing. A business may ask you for proof of your identity, a police report, and an affidavit before giving you the documents. It also may specify an address for you to send your request. Under certain circumstances a business can refuse to provide you with these documents. See www.consumer.gov/idtheft.
4. You have the right to obtain information from a debt collector. If you ask, a debt collector must provide you with certain information about the debt you believe was incurred in your name by an identity thief - like the name of the creditor and the amount of the debt.
5. If you believe information in your file results from identity theft, you have the right to ask that a consumer reporting agency block that information from your file. An identity thief may run up bills in your name and not pay them. Information about the unpaid bills may appear on your consumer report. Should you decide to ask a consumer reporting agency to block the reporting of this information, you must identify the information to block, and provide the consumer reporting agency with proof of your identity and a copy of your identity theft report. The consumer report ng agency can refuse or cancel your request for a block if, for example, you don't provide the necessary documentation, or where the information resulted from an error or a material misrepresentation of fact made by you. If the agency declines or rescinds the block, it must notify you. Once a debt resulting from identity theft has been blocked, a person or business with notice of the block may not sell, transfer or place the debt for collection.
6. You have the right to prevent businesses from reporting information about you to consumer reporting agencies if you believe the information is a result of identity theft. To do so, you must send your request to the address specified by the business that reports the information to the consumer reporting agency. The business will expect you to identify what information you do not want reported and to provide an identity theft report.

To learn more about identity theft and how to deal with its consequences, visit www.consumer.gov/idtheft, or write to the FTC. You may have additional rights under state law. For more information, contact your local consumer protection agency or your state attorney general.

In addition to the new rights and procedures to help consumers deal with the effects of identity theft, the FCRA has many other important consumer protections. They are described in more detail at www.ftc.gov/credit.

Your Rights Under State Law

STATE OF CALIFORNIA

Consumer Credit Reporting Agencies Act

You have a right to obtain a copy of your credit file from a consumer credit reporting agency. You may be charged a reasonable fee not exceeding eight dollars ($8). There is no fee, however, if you have been turned down for credit, employment, insurance or a rental dwelling because of information in your credit report within the preceding 60 days. The consumer credit reporting agency must provide someone to help you interpret the information in your credit file.

You have a right to dispute inaccurate information by contacting the consumer credit reporting agency directly. However, neither you nor any credit repair company or credit service organization has the right to have accurate, current, and verifiable information removed from your credit report. Under the Federal Fair Credit Reporting Act, the consumer credit reporting agency must remove accurate negative information from your report only if it is over seven years old. Bankruptcy information can be reported for 10 years.

If you have notified a credit reporting agency in writing that you dispute the accuracy of information in your file, the consumer credit reporting agency must then, within 30 business days reinvestigate and modify or remove inaccurate information. The consumer credit reporting agency may not charge a fee for this service. Any pertinent information and copies of all documents you have concerning an error should be given to the consumer credit reporting agency.

If reinvestigation does not resolve the dispute to your satisfaction, you may send a brief statement to the consumer credit reporting agency to keep in your file explaining why you think the record is inaccurate. The consumer credit reporting agency must include your statement about disputed information in a report it issues about you.

You have a right to receive a record of all inquiries relating to a credit transaction initiated in twelve months preceding your request. This record shall include the recipients of any consumer credit report.

You may request in writing that the information contained in your file not be provided to a third party for marketing purposes.

You have a right to place a "security alert" in your credit report, which will warn anyone who receives information in your credit report that your identity may have been used without your consent. Recipients of your credit report are required to take reasonable steps, including contacting you at the telephone number you may provide with your security alert, to verify your identity prior to lending money, extending credit, or completing the purchase lease or rental of goods or services. The security alert may prevent credit, loans, and services from

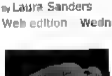
Small part of brain itching for a fight

Neuroscientists track the physical source of aggression in mice

By Laura Sanders

Web edition : Wednesday, February 9th, 2011



ENLARGE

TROUBLE SPOT

This three-dimensional model of the mouse brain shows the location of "fight neurons" (green) in the hypothalamus that researchers have linked to aggression

A cluster of nerve cells have founded their own tiny fight club. These cells, nestled deep in a primitive part of the brain, compel mice to aggressively maul not just intruder males, but also females and blown-up rubber gloves, a study finds. What's more, the fight cells have an intertwined and thorny relationship with nearby "mate" cells, a discovery that may shed light on human sexual violence.

"This is absolutely awesome," says neuroscientist Newton Canteras of the University of São Paulo, who was not involved in the study. "They [researchers] were able to pinpoint one tiny region in the hypothalamus that is responsible for the aggressive response."

The research, led by Dayu Lin of Caltech, who is now at New York University, was published in the Feb. 10 *Nature*.

Earlier studies had pointed to the hypothalamus, an almond-sized structure important for hunger, thirst and body temperature, as an aggression center in the brain. Electrical stimulation there made cats and rats attack targets. But researchers didn't have a clear idea of where in the hypothalamus the fight neurons reside.

Purpose of Form

A person who is required to file an information return with the IRS must obtain your correct taxpayer identification number (TIN) to report, for example, income paid to you, real estate transactions, mortgage interest you paid, acquisition or abandonment of secured property, cancellation of debt, or contributions you made to an IRA.

Use Form W-9 only if you are a U.S. person (including a resident alien), to provide your correct TIN to the person requesting it (the requester) and, when applicable, to:

1. Certify that the TIN you are giving is correct (or you are waiting for a number to be issued),
2. Certify that you are not subject to backup withholding, or
3. Claim exemption from backup withholding if you are a U.S. exempt payee. If applicable, you are also certifying that as a U.S. person, your allocable share of any partnership income from a U.S. trade or business is not subject to the withholding tax on foreign partners' share of effectively connected income.

Note. If a requester gives you a form other than Form W-9 to request your TIN, you must use the requester's form if it is substantially similar to this Form W-9.

Definition of a U.S. person. For federal tax purposes, you are considered a U.S. person if you are:

- An individual who is a U.S. citizen or U.S. resident alien,
- A partnership, corporation, company, or association created or organized in the United States or under the laws of the United States,
- An estate (other than a foreign estate), or
- A domestic trust (as defined in Regulations section 301.7701-7).

Special rules for partnerships. Partnerships that conduct a trade or business in the United States are generally required to pay a withholding tax on any foreign partners' share of income from such business. Further, in certain cases where a Form W-9 has not been received, a partnership is required to presume that a partner is a foreign person, and pay the withholding tax. Therefore, if you are a U.S. person that is a partner in a partnership conducting a trade or business in the United States, provide Form W-9 to the partnership to establish your U.S. status and avoid withholding on your share of partnership income.

The person who gives Form W-9 to the partnership for purposes of establishing its U.S. status and avoiding withholding on its allocable share of net income from the partnership conducting a trade or business in the United States is in the following cases:

- The U.S. owner of a disregarded entity and not the entity

My knee

The various items included in the mailings sent to me by MetLife are indeed relevant to my complaint against MetLife because they provide an insight into the overall performance and competency level of the company and why certain employees of this company on occasion, do not do the right thing, due to the fact that there is a lack of proper training or lack of supervision. The issue at hand namely, my abandonment by Shah Gorgani The analysis of these items yields information about MetLife s overall competency and in particular MetLife s competence in the training of its agents and representatives

Sure MetLife is allowed say that its agents may not give legal or tax advice. And in so doing, MetLife may refer its customers to an independent tax advisor However, agents licensed or employed by MetLife should be fully aware of the contents of most business forms of and be ready to offer full explanations regarding topics that come up in annuity business forms without necessarily providing tax advice

We are talking here about competency Agents need to be competent and need to document all interactions with customers and certainly not abandon a customer in a time of need.
If the company itself is not totally competent, we shouldn t be surprised that some of its agents are not totally competent either and don't fully understand their duty .

Our Next Stock: 150 Years of Booms, Busts, *and* Growth

When I was in my 20s, I decided I didn't much care for working in an office. Like most young men, I wanted a good income. I just didn't want to have to slave away at a desk job from 9 to 5 to get it.

I figured the solution was to work for myself. I thought that if I was right, something I enjoyed it wouldn't seem like work. I have always loved baseball, so I decided to sell tickets to baseball games and baseball memorabilia. I knew there were always opportunities for arbitrage in buying and selling baseball tickets and collectibles.

So I started buying $6 tickets to Cleveland Indians games and reselling them for $8. It doesn't sound like much, but that was a 30 percent profit. I was making money with the baseball cards too, and I had a part time.

But there was a problem. I was living off that money and there was little left to save for the future.

At some point, I wanted to stop working so hard. I realized that in order to do that, I would need a steady passive income to pay my bills.

I considered real estate. Savvy real estate investors can enjoy a nice income, but you need a lot of money to begin with or have the ability to borrow a lot.

"At some point, I wanted to stop working. I realized that in order to do that, I would need a steady income."

Plus, with real estate, even when you're generating money you have to deal with repairs, maintenance, and taxes.

I didn't want those headaches.

That's why I came upon investing. With stocks you don't have to worry about maintenance or repairs. You can just buy good companies that pay you to own them.

Investing is the perfect way to earn a reliable, honest income without having to work.

The Downside of Hot Stocks

Now, you have to pick the right investments. That's the hard part.

In truth, I figured out the right way to invest by doing it the wrong way.

The first stock I bought was a disaster. One of my friends was investing in LCBY, the yogurt chain. The company had recently gone public, and the stock was on a straight trajectory up. I invested $3,000. I had worked hard to save that money.

Because there were no online brokers at the time (it was 1993), I had to pay a $75 commission for the trade. That meant I was down 3 percent from the get-go. Yikes!

I wasn't worried, though. The stock was on a roll, and I figured I'd make that 3 percent back

This is normal for any cartridge. If this does apply to you, ink warnings or ink shortages may appear a bit low. Ink warnings or ink shortages will not reach the ink levels of cartridges with yours. How to test sending and receiving of a fax machine

Filed in Tech Tips on Nov 05, 2009

Presumably, you want to test your fax machine by sending a fax from it and receiving a fax with it. Here's how to do both

To test the send functionality of your fax machine, send a one-page fax to **1-888-877-1655** or **1-503 200-1300**. When it's finished transmitting, point your web browser to Fax Toy — a a a fun web site that displays whatever is faxed to that number. Within a minute, your fax should appear on the site. Click the thumbnail to see a large version.

To test the receive functionality of your fax machine, point your web browser to FaxZero. This site lets you send faxes for free to anywhere in the United States and Canada. Within a few minutes, your fax machine should ring — hopefully, it will automatically answer and spit out the test fax.

Experiment 6: Sliding Friction and Conservation of Energy

EQUIPMENT NEEDED

- Dynamics Cart (ME-9430)
- Stopwatch (SE-8702)
- Metric tape (SE-8731)
- Brick or block of wood
- Long board that can be used as a ramp
- Friction block (003-04708)
- Protractor

Purpose

In this lab the Dynamics Cart will be launched down a ramp as shown in Figure 6.1 while riding on a friction block. The initial elastic potential energy and gravitational potential energy of the cart are converted to thermal energy as the cart slides to a stop. The thermal energy generated on the surfaces is the same as the work done against sliding friction.

Figure 6.1

Theory

Using the principle of conservation of energy, we can equate the initial energy of the system with the final (i.e. thermal) energy of the system. This leads to

$$\frac{1}{2}kx^2 + mgDsin\theta = \mu_k mgDcos\theta \qquad \text{EQN 1}$$

(elastic P.E.) + (Gravitational P.E.) = (work done against friction)

where k is the spring constant of the plunger (from Experiment 4), x is the distance that the plunger is pushed in, m is the mass of the cart plus the friction block, D is the distance that the block slides after the cart's plunger is released, θ is the angle of the ramp to the horizontal, and μ_k is the coefficient of kinetic or "sliding" friction.

In this experiment you will use the principle of the conservation of energy to predict D given certain measurements you will make and the value of k determined in Experiment 4. First you will need to determine the coefficient of kinetic or "sliding" friction for the friction block.

Determining μ_k. If the angle of the ramp is high enough, the friction block will slide down the ramp with uniform acceleration due to a net force on the block. The net force on the block is the difference between the component of the gravitational force (mgsinθ) that is parallel to the surface of the ramp and the friction force ($\mu_k$mgcosθ) that retards the motion. The angle θ is the angle of the ramp when the block slides down the ramp with uniform acceleration. The acceleration down the ramp is given by

$$a = mgsin\theta - \mu_k mgcos\theta \qquad \text{EQN 2}$$

The average acceleration down the ramp is given by

$$a = 2d/t^2 \qquad \text{EQN-3}$$

where d is the total distance the block slides and t is the time required to slide through that distance. If the acceleration is uniform, EQN-2 equals EQN-3. You can use the measured values of the angle θ (the angle of uniform acceleration), the distance d, and the time t to calculate the kinetic coefficient of friction μ_k.

Dr. Peter Walker
Cancer Center, Brigham and Women's Hospital
220 Longwood Avenue
Boston, MA 02115

Dear Dr. Walker:

I am writing to express my interest in the position of Clinical Research Assistant in the Cancer Center at Brigham and Women's Hospital. I am in my sophomore year at Harvard University, where I am planning to concentrate in molecular and cellular biology. My professional interests lie in both lab research and clinical healthcare related to cancer, and I am eager to make a positive impact while interacting with patients undergoing treatment.

This position immediately caught my attention as a unique clinical research trials, which would complement my previous activities in lab research and statistical analysis. My experience last summer at the Dana Farber Cancer Institute allowed me to work with Dr. Jane Harrington, performing assays and experiments supporting her research. I learned valuable lab techniques and analysis, and the experience further solidified my interest in the area of cancer research. My research assistant role at the Martha Hospital introduced me to data related to the effects of personal hygiene risk, and I was able to use my analytical skills to organize and assess that data for future research efforts. These experiences have reinforced my strong interest in healthcare, and inspired my goal for a career in public health.

In addition to the skills developed in my research experiences, I also strengthened my oral and written communication and organizational skills through two campus positions at Harvard. My Advertising Representative and Office Assistant experiences have required me to successfully multi-task, work under pressure, prioritize, and solve logistical or organizational problems. These skills will be valuable in the Clinical Research Assistant role, enabling me to analyze and organize data while communicating and interacting with patients. I look forward to relating with patients on a personal level, while effectively helping them benefit from the cancer medical care services.

I have included my resume for your review. Thank you for your consideration, and I look forward to the opportunity to speak with you about my candidacy in greater detail.

Sincerely,

Carol Szczela-Dyer

I was born very very sick. I needed a small and large bowel transplant. My mom researched and researched and she found UPMC. My whole family moved here from New Zealand.

I got my transplant last year. I can do so many things without getting sick now. I love cooking... it just makes me feel happy because I can finally eat what I created.

UPMC helped me through all of my challenges trying to get through this, and we're just thankful.

This is Matisse's story of Life Changing Medicine. Told in her words, in her way. To hear more stories or share your own, go to UPMC.com/Stories today.

"I couldn't eat until I was 10 years old. Now I love cooking."

- Businesses
- Employers
- Clubs

- Trade associations
- Labor unions
- Political parties
- Military associations
- Private foundations
- Private charities
- Ethnic organizations

BAMBOO PLANTING AND CARE

PLANTING

Bamboos are happiest in a loose, loamy soil. When planting, dig a hole, double the diameter of the existing root ball, and a few inches deeper. Make sure to water the root ball of the plant deeply before planting. With the soil that comes out of the hole, mix an equal amount of organic material, such as planting mix (not potting soil), or mulch. Place some of the mixed soil in the bottom of the hole and tamp it down, so that when the root ball is carefully removed from the container and placed in the hole, the top of the root ball is at ground level. Back fill around the root ball with the soil mix, tamp it down, then form a 3-4" high basin around the plant to hold water. Mist the leaves to insure the plant does not shock.

WATERING

Water the root ball of the plant deeply before planting, and then water 3-4 times per week, depending on the weather for the first month. Summer watering: four times a week and cooler weather: two or three times a week. If the sides of the leaves start curling up, it is not being watered often enough or for too short a time.

FERTILIZING

Bamboo is part of the grass family and likes a high nitrogen (N) fertilizer like that used on lawns. Fertilize as recommended for grass by the manufacturer.

PESTS

Generally bamboos are pretty much pest free. Some varieties of clumping bamboo (particularly multiplex species) may get mealy bug (white cottony splotches) and resulting black sooty fungus. Treat with Orthonex. Occasionally bamboos will show evidence of mites (bleached looking spots with small webs on the underside of leaves), and aphids (small, white, tan, or green insects). Treat them with an insecticide spray.

MULCH

Bamboos will thrive if they have a 2-4" layer of mulch around the base of the plant. Let fallen leaves remain on the ground, and once a year add other organic material – mulch or planting mix.

PRUNING

Every year or two it is a good idea to thin out the dead culms (stalks or canes) in the center of a clump. This will allow better air circulation and faster growth of the newer culms. You can reduce the height of bamboo by cutting the taller culms ¼ - ½ above a node. To even out the appearance of the clump, you can also cut back the side branches.

If your dimmer does not have a remote control function you need only read (a) below. If you have purchased a remote control dimmer read (a) and (b) below

(a) Touch Control

To initialise the dimmer, touch the circular "sensor" on the front of the plate once for 2 seconds. The dimmer will respond by making the lights brighter. A single touch will now turn the lights on or off. To turn the lights, keep contact with the sensor until the desired light level is reached. While contact with the sensor is maintained, the brightness will cycle up and down. To change the direction of the dimming cycle remove contact and then touch the sensor again. When the brightness reaches the level you require, remove contact with the sensor.

(b) Remote Control

Dimmers with an "eye" in the middle of the sensor are pre-programmed to respond to button 1 and button 6 on the VARILight remote control handset (purchased separately). Alternatively, the dimmers with an "eye" in the middle of the sensor can be programmed to respond to any of

Another thing that has to be taken note of, whether the DCOM tunneling is enabled. To enable the DCOM tunneling go to Start and then Run. Write DCOMCNFG and then click on the Component Services. From the component services, go to My Computer and click Properties. After this, you go to Default Properties tab and then Enable DCOM. Once you have done this, scroll down to Tunneling TCP/IP and click the "Move Up" button and bring it to the top of the list. Once you have done all this, restart the computer and you see that "The RPC server is unavailable" error is solved.

Stress, Sleep and Illness

There is a close relationship between the three items listed above. Stress and poor quality or insufficient sleep may produce illness or aggravate the illness(es) one already has. Sometimes we are able to recognize the source of stress in our lives. Sometimes we are not.

Sleep is a time when the body rebuilds and restores itself. This process includes all systems of the body – the brain, muscles (including the heart), ligaments, joints and tendons. When we don't receive sufficient good-quality sleep, not only do we not get the restorative care our bodies require, but that lack of sleep becomes an independent source of additional stress.

Although we cannot prevent exposure to stress in our lives, we do have control over how we respond to stressful situations. We can learn to control those responses and make simple decisions that result in less stress in our lives. With less stress and better sleep, we will have less disease and the diseases that we do have will be less severe and have less impact.

CancerTYPE ID

Molecular Classification with CancerTYPE ID

FFPE Tissue Processing & Tumor Enrichment

- CancerTYPE ID requires as few as 300-500 viable tumor cells and is compatible with limited biopsy specimens such as FNAs, cytological specimens, and small core needle biopsies.
- CancerTYPE ID routinely employs laser guided microdissection to enrich for tumor specimen.

Gene Expression Profiling

- CancerTYPE ID uses a robust real-time RT-PCR platform to detect very small differences in gene expression
- CancerTYPE ID measures and analyzes the gene expression of 92 genes, 5 normalization genes and 87 lineage determinant and tissue specific genes, most of which are not routinely measured by IHC.

Reference Tumor Database & Algorithm

- CancerTYPE ID uses a computational algorithm to predict the patient's tumor type based on the degree of similarity of the sample's 92-gene expression profile to a reference database of gene expression profiles. The reference database contains gene expression information from over 2,000 tumor specimens of known histogenesis, and representing ~95% of all solid tumors based on incidence
- The CancerTYPE ID algorithm provides a predicted main type and any sub-types in rank-order by relative probabilities which are based on the tumor's gene expression similarity to tumors of these types in the reference database.

Molecular Classification

- CancerTYPE ID classifies 28 tumor types and 50 tumor subtypes.
- In an independent validation of 790 blinded samples, the molecular diagnosis was 87% accurate for main tumor type and 82% accurate for tumor subtype

EXAMPLE TEST REPORT

Interpreting CancerTYPE ID Test Results

MOLECULAR DIAGNOSIS
The tumor type with the highest probability is reported as the molecular diagnosis. In this example, the patient's tumor has 98% probability of matching an over-all tissue and cancer type within the CancerTYPE ID reference database. If the highest probability is <78%, the tumor is reported as indeterminate, in this case, the test report will not indicate tumor types that can be ruled out and those that cannot be excluded

CAN NOT BE EXCLUDED
When applicable, tumor types from the CancerTYPE ID reference database that show some gene expression profile similarity to the patient's sample such that they cannot be excluded from diagnostic consideration will be listed here in relative rank order

RULE OUTS
The CancerTYPE ID test report also lists tumor types that can all be ruled out with 95% confidence in an independent validation of 790 blinded samples, the rule-outs were 95% accurate. This may provide useful different diagnostic information when two or more potential tumor types are suspected and one or more tumors may be excluded in the rule outs

Writing Resumes and Cover Letters

At some point during an academic career, the vast majority of students will have to write a cover letter and resume. As part of a class assignment or a component of your job search, resumes and cover letters need to be written concisely and formatted well in order to be effective. This type of writing utilizes action words and descriptive statements as a way of conveying your qualifications and career objectives. As complimentary pieces of writing, your resume and cover letter function together as an introduction to a potential employer so it is imperative that you allow enough time for revision.

1) PREPARE YOUR MATERIALS

As with any type of specific, personal writing, do some preparation ahead of time in order to decrease frustration during the writing process itself. Obtain copies of documents such as transcripts, resumes and job application form itself. Keeping them in front of you will make your job of writing much easier. Make a list of important information, in particular names and exact titles of former employers and supervisors, titles of jobs you have held, companies you have worked for, dates of appropriate work or volunteer experiences, the duties involved, etc. In this way you will be able to refer to these materials while writing in order to include as much specific detail as possible.

2) WRITE A FIRST DRAFT

After you have gathered the necessary materials, the next step is creating a draft of your resume or cover letter. You should begin with your resume because you will be referring to it later within your cover letter. While there are a number of ways to organize these pieces of writing, there are some general items that need to be included and some rules that should be followed (see following samples).

FORMAT

On your resume, your name should be the first thing on the page - centered at the top, with your address and phone number directly underneath. The rest of your resume should be divided into distinct sections with appropriate headings (in capital letters and either boldface or underscored) and should be lined up on the left margin. Skip lines between each entry.

The choice of headings differs from person to person, but it is a good idea to include the following in this order:

- CAREER OBJECTIVE
- EDUCATION
- WORK EXPERIENCE (can be divided into professional and volunteer experience)
- SPECIAL SKILLS (or HONORS AND ACTIVITIES)

For a recent graduate, the PROFESSIONAL EXPERIENCE section may be rather short, so you should pay close attention to using active words and detail to make the most of what you have. Remember, just listing your job history is not enough, you need to demonstrate your qualifications by describing your responsibilities in detail.

Also include information such as ranking the Dean's List, using scholarship chairperson for your fraternity or sorority, or volunteering for the Special Olympics, which could go under HONORS AND ACTIVITIES, while your knowledge of specific computer systems and software packages would fall under the SPECIAL SKILLS heading.

Now you are ready to move on to your cover letter. Your cover letter will, in most cases, utilize a standard business letter format, with block paragraphs lined up on the left margin. It usually does not exceed 300 words. The format for the opening

Adobe Acrobat PDF Files

Adobe® Portable Document Format (PDF) is a universal file format that preserves all of the fonts formatting, colours and graphics of any source document, regardless of the application and platform used to create it.

Adobe PDF is an ideal format for electronic document distribution as it overcomes the problems commonly encountered with electronic file sharing.

- ***Anyone anywhere*** can open a PDF file. All you need is the free Adobe Acrobat Reader. Recipients of other file formats sometimes can't open files because they don't have the applications used to create the documents.
- PDF files ***always print correctly*** on any printing device.
- PDF files always display ***exactly*** as created, regardless of fonts, software, and operating systems. Fonts, and graphics are not lost due to platform, software and version incompatibilities.
- The free Acrobat Reader is easy to download and can be freely distributed by anyone.
- Compact PDF files are smaller than their source files and download a page at a time for fast display on the Web.

General Issues	Suggested Solutions
Resumed Transactions and Report and Transaction are no longer listed for cashiers to access (even chronological order. They now include all store transactions. This makes it difficult to find what you want quickly	Make the default list for that register, and in reverse order
The Reusable Bag Discount button is small, but it is the most used button on that menu	Making it large would speed things up
Naked Lunch has to hit "Total" before they can tender out a sale whenever they use the NL discount. This slows things down	Eliminate this step.
Spring Mill "Other" button doesn't work properly. It opens a menu for Water Bridge and Spring Mill menus. It doesn't go to the "Spring Mill – Other" menu	Have the button go directly to the Spring Mill – Other menu.
Spring Mill items are difficult to find. There are too many menus to search through. The Holiday menu in particular confuses people, as it contains items that are unrelated to holidays	Eliminate the Holiday menu, and make the bread items strictly alphabetical (perhaps with three or four parts). Everything that isn't bread should still be under the Other menu
Login process is needlessly long (since to open massive, second time to enter cash drawer without it)	Make login a simple, one step process.

Who Can Participate in NYC SAFE Disposal Events

This spring, the NYC Department of Sanitation is holding five SAFE Disposal Events (one in each borough) to provide NYC residents with a one-stop method to get rid of potentially harmful household products.

Only NYC residential waste will be accepted. No commercial vehicles allowed. Residents MUST provide proof of NYC residency (NYS driver's license, utility bill, etc.)

Tips

- Alkaline batteries and latex (water-based) paint no longer contain harmful materials and can be discarded in the trash
- Latex paint must be dried out before the empty can is recycled...visit nyc.gov/wasteless/paint for more options.
- Certain items can't or shouldn't be discarded in the trash or recycling; see nyc.gov/wasteless/disposal for donating, take-back programs, and other disposal options.
- Syringes and lancets should be clearly labelled and packaged in a "sharps" container or other leak proof, puncture-resistant container

AS the old ferry captain tied up his boat to the dock, he heard a small voice softly repeating "I am NOT! I am NOT!..." In between sniffles. Looking towards the end of the dock, he spied a little girl in a pastel green dress sitting, legs dangling toward the water, facing the colorful sunset.

He slowly shuffled towards the little girl, not wanting to frighten her. Casting his voice in his most friendly tone, he spoke, "hello little girl, are you alright? Is everything ok?" The girl glanced quickly behind her, clutching a piece of paper to her chest, but seeing the kindness in the old man s eyes, relaxed and sighed "I m ok, it s just that someone called me a name and it made me unhappy! The old captain replied, "No one may call you anything but your real, true name. What IS your name little girl?" The girl shyly responded "Katy... but well Bobby called me a wench!" She looked down at the paper held in her hands. "I am NOT a wench...I am NOT!"

The captain could see, over her shoulder, a title on the page "Inspired by Eric" He asked the girl what she held in her hand. She quietly said, "Oh it s nothing, just some thoughts I wrote for my journal. Things I have wanted to say for a long time, things I needed to say for a long time" The captain carefully sat down next to the girl on the end of the dock. He reached for his reading glasses in his pocket and asked the girl if she would let him read what she wrote. At first, she pressed the paper to her chest protectively and started to reply "Oh I couldn t ...", but the feelings of kindness and comfort she sensed in the old man lessened her initial reluctance and, averted eyes gazing toward the setting sun, passed the writing to the old man

Adjusting his glasses, the old captain began reading the words written on the page in the careful handwriting of a bright little girl, both beautiful and easily readable. Every line he read brought him to the realization that this was indeed a precocious and intelligent little girl. He glanced sideways occasionally, over his glasses, at the girl s face, sometimes with a small nod or smile. The girl watched the old man s face intently for signs of disapproval or dismissive humor but saw none.

Finally, after a couple of minutes of his eyes tracing the narrative down the page, the captain raised his eyes and turned them toward the anxious little face looking up at his. He cleared his voice, and in a most serious manner told little Katy, "My dear, Bobby couldn t be more wrong, you are most definitely NOT a wench. However, you are MOST definitely, a writer!"

A smile that started out shy, but quickly turned beaming, transformed little Katy s face into a vision of lovely youthful happiness such that the old captain s heart caught in his chest. The girl sighed contentedly and leaning her head into his shoulder, they both turned their faces to catch the last warming rays of the day.

What if I purchase my equipment before I receive ADP approval?

ADP will only pay the amount approved after the date of approval. If you ask your vendor to order your equipment before ADP approves funding, you will be responsible for paying the full amount to the vendor if ADP cannot approve your application.

How do I get my mobility equipment?

You will choose your vendor at the time of assessment. We advise you to shop around among ADP Registered Vendors as services may vary.

How do I get my Power Wheelchair with Power Dynamic Tilt and/or Recline?

All eligible individuals who apply for ADP funding assistance for a power wheelchair that includes power dynamic tilt and/or recline must obtain their equipment from the Central Equipment Pool (CEP) for High Technology Wheelchairs. Requests for the addition of power dynamic tilt and/or recline to an existing power wheelchair must also go through CEP. ADP has an agreement with CEP that requires the equipment pool to provide high technology wheelchairs to ADP clients. CEP provides ADP clients throughout Ontario with high technology wheelchairs at a discounted price, quality recycled equipment, and a rebate on the client's costs once the equipment is returned to the pool. All routine maintenance and repair costs are provided free of charge to CEP clients. All components of the system, including positioning devices must go through CEP.

For more information call CEP at: 416 757 2011 or Toll Free at 1 800 395-6661

Who do I call if I have problems with my equipment?

If you have any problems using your new equipment, please contact your authorizer and vendor and/or CEP as applicable.

Does ADP pay for repairs?

ADP does not pay for repairs and maintenance (CEP excepted). You own the equipment and are responsible for taking care of it.

How much money does ADP contribute?

ADP pays 75 per cent of the ADP approved price. You pay 25 per cent.

If you are receiving social assistance benefits under Ontario Works (OW), Ontario Disability Support Program (ODSP) or Assistance to Children with Severe Disabilities (ACSD), ADP will pay 100 per cent of the ADP approved price.

Does this mean that ADP will pay 100% of my costs for equipment/supplies?

Not necessarily. You must pay the vendor directly for any non ADP funding options you may choose to purchase for your equipment. Be sure to ask your vendor how much of the total cost you will be responsible for.

ADP does not pay for batteries for power wheelchairs.

What if I need to replace my equipment?

ADP may contribute to the cost of a new mobility device if:

- Your medical condition and/or functional ability or body size has changed or
- Your old device has worn out.

The amount of the contribution will vary depending on ADP funding you have previously received. ADP does not pay for replacement if the original equipment is lost, stolen or damaged due to misuse. We encourage you to buy insurance to cover these situations.

What if I have more questions about ADP?

Test your fax machine

To test the capability of your fax machine, follow the directions below

NOTE Be sure that your phone number is not Caller ID blocked by your telephone company prior to attempting to send and receive a fax Pressing *82 before dialing the toll free number will unblock the Caller ID blocking feature in most areas Other phone company services can prevent you from receiving a fax Including voice mail call blocking or call privacy features

NOTE Whenever troubleshooting a fax issue, it is good practice to set the *Automatic Reports* option to **Every Error** before attempting a test fax This way even if the sent fax fails, an error code will be generated that will guide you in future troubleshooting This option is available in different places on different products consult the product *User's Guide* for specific steps

1. Send a one page black and white text fax to **1-888-hpfaxme** (1-888-473-2963)
2. When your fax is received by the HP Test Fax Service we will generate a return fax to you within five minutes confirming that we received your fax. This verifies that you can both send and receive a fax with your fax machine.

If you do not receive a return fax within 5 7 minutes, there may be a problem with the setup of your fax machine. Consult the user manual that came with the product for proper setup and configuration.

NOTE. The most common cause of failure is that the fax number set in the Fax Header on the machine does not match the number of the phone line connected to the fax Also, ensure that the fax header contains the full 10-digit telephone number of the fax machine, including the area code.

KRAS Mutation Analysis by PCR

Intended Use: The KRAS mutation analysis PCR assay is used to detect mutations in exons 2 and 3 of the KRAS gene in DNA extracted from formalin-fixed, paraffin-embedded (FFPE) tissue specimens of human colorectal cancer. The assay detects 29 somatic mutations in codons 12 and 13 of exon 2 and codon 61 of exon 3 of the KRAS gene. The assay is designed to detect KRAS mutations in tumor cells that comprise at least 10% of the total cell population in the specimen. The assay is not intended to detect mutations in cell types other than tumor cells.

Methodology: DNA is extracted from FFPE tissue specimens and subjected to real-time PCR amplification using primers specific for the KRAS gene. Following amplification, melting curve analysis is performed to detect the presence of mutations in the KRAS gene. The assay can detect mutations in DNA extracted from as few as 10 FFPE tissue sections, depending on the size of the tissue specimen and the percentage of tumor cells present.

Results: A positive result indicates the presence of a mutation in the KRAS gene in the tumor cells of the patient. A negative result indicates that no mutations were detected in the KRAS gene in the tumor cells of the patient. An invalid result indicates that the assay was not able to provide a reliable result, and the test should be repeated.

Limitations: The assay is not intended to detect mutations in cell types other than tumor cells. The assay is not intended to detect mutations in tumor cells that comprise less than 10% of the total cell population in the specimen. The assay is not intended to detect mutations in tumor cells that are not present in the specimen. The assay is not intended to detect mutations in tumor cells that are not present in the specimen.

Fried Brussels Sprouts with Walnuts and Capers

Recipe courtesy Food Network Magazine, excerpted from Michael Symon's book Live to Cook (Clarkson Potter)

Prep Time	15 min	Level	Serves
Inactive Prep Time	–	Easy	6 servings
Cook Time	4 min		

Ingredients

Canola oil, for deep-frying
1 clove garlic, minced
4 salt-packed anchovy fillets, rinsed, filleted and minced
1 serrano chile, seeded and minced
1/4 cup red wine vinegar
1 tablespoon honey
2 scallions, white and green parts, thinly sliced on the bias
1/2 cup walnut pieces, toasted and coarsely chopped
1/2 cup extra-virgin olive oil
1 pound Brussels sprouts, trimmed and quartered lengthwise
2 cups loosely packed flat-leaf parsley leaves
2 tablespoons salt-packed capers, rinsed and patted dry
Kosher salt and freshly ground black pepper

Directions

Pour enough oil into a medium pot so that the oil comes 3 inches up the sides. Heat the oil to 350 degrees.

While the oil is heating, whisk together the garlic, anchovies, serrano, red wine vinegar, honey, scallions, walnuts and extra-virgin olive oil in a bowl large enough to toss all of the Brussels sprouts. Keep the bowl near the stovetop.

Working in batches, deep-fry the Brussels sprouts until the edges begin to curl and brown, about 3 minutes. To the last batch add the parsley and capers (stand back, the capers will pop and sputter). Give the contents of the pot a stir. When the color of the parsley becomes a deeper, more saturated shade of green, about 30 seconds to 1 minute, remove the contents of the pot with a skimmer and place directly in the bowl of dressing. Toss to coat. Add salt and pepper to taste.

ADS now uses the **Automated Dispatch System (ADS)** for taking your service calls. This system offers many advantages over convential call handling systems.

* **No Hold Time** - you never have to wait to hold to place an Automated Service Request!
* **Speed and Convenience** - you can place your call in about one minute - 24 hours a day, 7 days a week
* **Accuracy** - Your Service Technician hears your description of the problem in your voice
* **Fax Back Confirmation** - You many request a fax confirmation of your call with a confirmation number

Of course, you may speak to a live Dispatcher any time by pressing 0

Placing a call using our Automated Dispatch System

Have your **Equipment ID Number** ready

Call our service number at **(888) 888-8888**

1 When the Automated System answers...press **1** to leave an Automated Service Request.

2 You will hear several prompts asking you to speak items such as **Equipment ID, Company Name and Address, Contact Name and Phone Number** and a **Detailed Service Message** Follow the prompts and press * after you have completed speaking each item

3 Once you have completed your recordings, you have the option to **Listen, Append or Save** your message. Press # if you wish to save your message and continue.

4 You are then prompted to receive a Fax Confirmation. Press **1** for **YES**. Press **2** for **NO**
* If you choose **YES** - you are prompted for a fax area code and number
Use the buttons on your phone to enter your fax number followed by the * key
* The system will speak your fax number back to you and ask for verification

5 When you have completed these steps, the system will respond, " **Information accepted**" and return to the Dispatch Service Menu. You may hang up or choose other options if you wish

Signs You've Grown Up

1. Your houseplants are alive, and you can't smoke any of them.
2. Having sex in a twin bed is out of the question.
3. 6 A.M. is when you get up, NOT when you go to bed.
4. You hear your favorite song in an elevator.
5. You keep more food than beer in the fridge.
6. You don't know what time Taco Bell closes anymore.
7. Dinner and a movie is the whole date instead of the beginning of one.
8. Older relatives feel comfortable telling sex jokes around you.
9. If you're a woman, you go to the drug store for ibuprofen and antacid, not condoms and pregnancy tests.
10. You read this entire list looking desperately for one sign that doesn't apply to you and can't find one to save your sorry old butt.

Hail Mary

Today begins the 90th Anniversary of the appartition of the Virgin of Fatima

When you receive this email say a Hail Mary and ask for a special favor

"Hail Mary, full of grace. The Lord is with thee. Blessed art thou among women and blessed is the fruit of thy womb, Jesus. Holy Mary, Mother of God, pray for us sinners now and at the hour of our death, Amen." (your request)

Please do not break the Novena , send it to 12 people you think deserve justice, peace, love, health, prosperity and truth. When you are down to nothing, God is up to something. This has been traveling since 5/13/07!

Hello!

This is a sample test file which is being sent to you as per your request via the Interpage FreeFax(sm) Service!

This service is intended to provide a preliminary evaluation as to the quality and timeliness of Interpage's subscription fax service(s).

If you review the cover sheet which was transmitted with this fax, you will note the first letter of the name you had indicated in the TO: field of the FreeFax request page. This letter serves to correlate the fax request which you had sent with this test fax transmission result.

This file is a sample MS Word file - many other file types are supported.

If you have any questions regarding Interpage's OutFax(sm) Service, including the FaxUnlimited(tm) service with no-per-fax or per-minute charges, please feel free to contact us at:

Phone: +1 (510) 315-2750 9AM to 4:30 PM M-F Pacific Time

E-Mail: mail-support@interpage.net

Web: http://www.interpage.net

Thank you for your interest!

Notes: 1. Due to the malicious use of this free fax service, Interpage will not forward numeric pagers and text messages, only the above three (temporary) messages will be transmitted. You may establish a trial account for evaluation purposes by filling out the form located at https://www.interpage.net/mail-fax-trial.html, omitting any billing information and clearly indicating a valid e-mail address and contact telephone number. Please call (510) 315-2750 for additional details.

2. This fax is not a solicitation nor is it an offer! It was sent by a client of Interpage's web site who entered your destination number as either as a recipient of this test fax. As such destination may not receive more than two faxes in a given week. However, if you think that someone (sending you faxes) is abusing this service and you wish to have your number blocked, please call (510) 315-2750 and we will block your fax number from the FreeFax service.

836 S Elizabeth St
LIMA, OH 45804

Recipe By: QUINOYE

"This is the crunchiest, spiciest, homemade fried chicken I have ever tasted. It is equally good served hot or cold and has been a picnic favorite in my family for years."

Ingredients

3 cups all-purpose flour
2 1/2 tablespoons garlic salt
1 tablespoon ground black pepper
1 tablespoon paprika
1/3 teaspoon poultry seasoning
1 1/3 cups all-purpose flour
1 teaspoon salt
1/4 teaspoon ground black pepper
2 egg yolks, beaten
1 1/2 cups beer or water
1 quart vegetable oil for frying
1 (3 pound) whole chicken, cut into pieces

Crisco Vegetable Oil Pure
$2.69 expires in 4 days

Directions

1. In one medium bowl, mix together 3 cups of flour, garlic salt, 1 tablespoon black pepper, paprika and poultry seasoning. In a separate bowl, stir together 1 1/3 cups flour, salt, 1/4 teaspoon pepper, egg yolks and beer. You may need to thin with additional beer if the batter is too thick.
2. Heat the oil in a deep fryer to 350 degrees F (175 degrees C). Moisten each piece of chicken with water, then dip in the dry mix. Shake off excess and dip in the wet mix, then dip in the dry mix once more.
3. Carefully place the chicken pieces in the hot oil. Fry for 15 to 18 minutes, or until well browned. Smaller pieces will not take as long. Large pieces may take longer. Remove and drain on paper towels before serving.

Switch Between Dialog Boxes and the Command Line

You can display prompts on the command line instead of using a dialog box. Or switch back again. This option is useful primarily when using scripts.

Some functions are available both on the command line and in dialog boxes. In many cases, you can enter a hyphen before the command to suppress the dialog box and display prompts on the command line instead. For example, entering **-layer** on the command line displays the Layer Properties Manager. Entering **layer** on the command line displays the equivalent command line options. Suppressing the dialog box is useful for compatibility with earlier versions of AutoCAD® and for using script files. There may be slight differences between the options in the dialog box and those available on the command line.

These system variables also affect the display of dialog boxes:

- ATTDIA controls whether INSERT uses a dialog box for attribute value entry
- CMDNAMES displays the name (in English) of the currently active command and transparent command
- EXPERT controls whether certain warning dialog boxes are displayed
- FILEDIA controls the display of dialog boxes used with commands that read and write files. For example, if FILEDIA is set to 1, %SAVE% displays the Save Drawing As dialog box. If FILEDIA is set to 0, SAVEAS displays prompts on the command line. The procedures in this documentation assume that FILEDIA is set to 1. Even when FILEDIA is set to 0, you can display a file dialog box by entering a tilde (~) at the file prompt.

FILEDIA and EXPERT are useful when you use scripts to run commands.

Adobe Acrobat PDF Files

Adobe® Portable Document Format (PDF) is a universal file format that preserves all of the fonts formatting colours and graphics of any source document regardless of the application and platform used to create it

Adobe PDF is an ideal format for electronic document distribution as it overcomes the problems commonly encountered with electronic file sharing

- ***Anyone, anywhere*** can open a PDF file All you need is the free Adobe Acrobat Reader Recipients of other file formats sometimes can't open files because they don't have the applications used to create the documents
- PDF files ***always print correctly*** on any printing device.
- PDF files always display ***exactly*** as created, regardless of fonts software, and operating systems Fonts and graphics are not lost due to platform, software and version incompatibilities
- The free Acrobat Reader is easy to download and can be freely distributed by anyone.
- Compact PDF files are smaller than their source files and download a page at a time for fast display on the Web.

29.4.1 FORCE_ALERT Message (Function Code 0xB409)

Command Class = 0x03	Command Type= 0x09	Function Code = 0xB409
Configuration Device Level	Configuration Group 0	FORCE_ALERT

The FORCE_ALERT command generates an alert error condition in the device. This can be useful for testing Host error collision handling, and also in preparation for a Core dump where the device did not issue a fatal alert message.

The FORCE_ALERT command can be used to generate a "fatal alert" that will flush the ARM caches and also save important working data that would otherwise be lost during the Coredump process (that is device RESET) when using OSM_ENCAPS control.

The command takes a single 16 bit parameter which specifies the Alert Type generated by the device. When preparing for a Coredump the recommended use is Alert Type 0x0024 which generates a driver abort (Alert Types are described in the Section 29.4 "Alert Diagnostic Indication Format, on page 538.)

Parameter 1 (FIFO Word 4) Alert Type to be generated

FIFO Word	Description
4	bits 15:0 Alert Type to be Generated Alert type 0x0024 Data 2 code is recommended for Coredump

29.5 Diagnostic Output Paths

Diagnostic messages and responses can be transferred between the MSP Device and the Host using the PCI/HPI interface or the RMII Ethernet interface (using Open Diagnostics and OSM_ENCAPS).

Open Diagnostics have the ability to be redirected to a different output. Redirection can reduce the load for a Host to recognize, store and capture debug information when needed. With redirection, the diagnostics can be redirected to Ethernet (for instance) where the debug information will be automatically routed to a designated sniffer.

- Path 1: REDIRECT OVER OSM_ENCAPS or REDIRECT OVER IP/UDP
- Path 2: Default

29.5.1 Sequence for Configuring Unified Diagnostic Commands Example

- SET_TDM_PARAMS – Device Level Configurations first
- SET_ETH_HDR_DEVICE – MSP Device Source MAC Address,
- IP_SERVICE_CFG – required before SET_IP_HDR command
- IP_ADDRESS – MSP Device Source IP Address.
- ARP_CONTROL_CONFIG – optional for Host.
- NIF_SPLITCT – NIF of Ethernet interface to which Open Diags will be redirected
- REDIRECT OVER OSM_ENCAPS or REDIRECT OVER IP/UDP
- SUPVSR_CREATE_CHANNEL

After the SUPVSR_CREATE_CHANNEL command, the "Enable diag" commands can be issued before or after enabling Voice (VOPFNA) on a specific channel. If issues are required from the beginning of a voice call, the "Enable diag" command must be sent before enabling voice on a specific channel.

Baked Ham Honey Glaze

Serves

Ingredients

15 pound fully cooked smoked ham

2 cups water

1/2 cup honey

1/2 cup orange juice

1 cup brown sugar, packed

Whole cloves

Instructions

1. Remove rack from roaster oven. Pour 2 cups of water into the insert pan; put the roaster cover on and preheat roaster oven to 325°F.
2. Trim thick part of fat off of ham down to 1/4 inch. Score remaining layer of fat into diamond design, this will help hold the glaze. Insert whole cloves into each diamond.
3. Place ham on rack then place in roaster and cover. Bake for 1 hour.
4. While ham is cooking, combine remaining ingredients to make glaze.
5. Remove cover and spoon half of glaze over ham. Replace cover and bake 1 more hour.
6. Remove cover and spoon remaining glaze over ham. Replace cover. Bake for 10 minutes to set glaze. Internal temperature of ham should be at least 140°F.

I have upgraded the HD to 1tb Added memory to 8gb I also added internal tv tuner The memory is so-dimm notebook memory 2x4gb modules The wireless is mini pci-e The internal wireless antennas are generic wireless antennas The tv tuner is pci-e also The tv antenna was hand built using a wireless antenna cable and a rg 58u connector from radio shack The bluetooth is a small usb bluetooth dongle The multimedia ir for windows media center is usb receiver with media remote I am still working on finding the internal ir module since there is a 4 pin connector on the motherboard I can provide detailed information and pictures if requested To disassemble the et2410 you need to remove the screws under the plastic panel that connect the stand to the computer assembly Then there is four rubber plugs on the back of the pc in the corners that need to be removed (pry out with thumb tack) Next remove the screws under these plugs plus one screw between the two ladies on back. The split between the two labels will allow you to use small phillips to loosen the screw without messing up the labels. I think there is two screws where the stand use to be Remove all the screws then use a plastic credit card (I prefer to get the gift card blanks from any store that has these cards instead of using a real credit card) Carefully slide the card around the edge of the pc case The case will seperate as you slide the card around the sides.

After the case is loose lift it off and you will see the mini pci-e slots and memory slots The pics will show where the cards go and the wiring for antennas Let me know if you want to see the pics NOTE: this WILL void your warranty !!!!!!!!!!!!!!!!

To the right are pages that folks have faxed us recently. Click any thumbnail to see the large version and rate it for interestingness

You can fax something interesting to 1 888 877 1655 (your boss will never notice... maybe) or 1 503 200-1300 (long distance to Portland, Oregon) and it should appear here within a couple of minutes. (It's a toll free number if you're in the USA.) Keep it clean & legal.

Fax single page documents with no cover sheet. If you fax more than one page, only the last page will appear here. We try to snip off the top few pixels of the page where your company name and fax number should appear, but make no promises that this will actually work.

So after having the X850C for about a week now I have to say we are very pleased. Out of the box the Sharpness needed to be dialed down some. I ended up between 45-50. I use VIVID and tweaked some of the picture settings. There is also another key setting to keep a lookout for after you hit the HOME button. It's under Picture and Display after you tap Settings. Go to Dynamic Range. Pause your image and toggle between LIMITED and FULL. Depending on your source one will blow the other out of the water. Image looked a little cloudy but after charging it blacks looked great and the image was full of POP! Also for best results turn the Light a Sensor off.

Obviously you can tweak yourself to your personal taste. We are exceptionally happy with the clarity and motion. DirecTV looks good on all HD channels. Sports look terrific. Hockey you can keep up with the puck easily. Basketball the ball is not as blurry in the air. Football should be terrific as well. Can't wait to see the grass this season! Blu-Ray movies are like looking through a window. As for 3D we didn't mind it. We did pick up our own TDG 400A glasses from eBay. Movies looked pretty good with minimum to none crosstalk. As for streaming it looked very good. I was impressed! Google works reasonably well but internet features will depend on your signal. My TV has firmware updated twice. First one took a hour. Second one 25 minutes. Oh another cool feature we like is the Daydream Mode. You can change your TV screen into a classy looking photographer's best work! Definitely a conversation starter during a party or with any company over at the time. The biggest gripe I have is there is not an easy quick SLEEP TIMER short cut. Though it does have many options once you get there. Leaving off on a positive note I love the PIC OFF button on the remote. If I am watching something questionable you can hide the image at the press of a button! Love it!! As for sound it is not half bad for a "TV" but I suggest a good sound bar. I am using a Martin Logan so we get the best of both worlds with picture and sound!

With a little bit of tweaking this midrange 4K Smart TV can look very close to a high end model. At the current sale price it is a steal!!!

First let me start off by saying I never write reviews on anything, ever. I do read

CancerTYPE ID — Molecular Classification with CancerTYPE ID

FFPE Tissue Processing & Tumor Enrichment

- CancerTYPE ID requires as few as 300-500 viable tumor cells and is compatible with limited biopsy specimens such as FNAs, cytological specimens, and small core needle biopsies.
- CancerTYPE ID routinely employs laser guided microdissection to enrich for tumor specimen.

Gene Expression Profiling

- CancerTYPE ID uses a robust real-time RT-PCR platform to detect very small differences in gene expression.
- CancerTYPE ID measures and integrates the gene expression of 92 genes, 5 normalization genes and 87 lineage determinant and tissue-specific genes, most of which are not routinely measured by IHC.

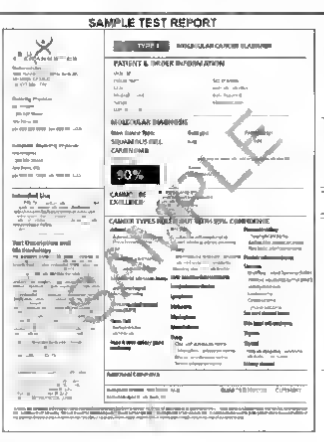
Reference Tumor Database & Algorithm

- CancerTYPE ID uses a computational algorithm to predict the patient's tumor type based on the degree of similarity of the sample's 92-gene expression profile to a reference database of gene expression profiles. The reference database contains gene expression information from over 2,000 tumor specimens of known histogenesis, and representing ~95% of all solid tumors based on incidence.
- The CancerTYPE ID algorithm provides a predicted main type and any sub-types in rank-order by relative probabilities, which are based on the tumor's gene expression similarity to tumors of these types in the reference database.

Molecular Classification

- CancerTYPE ID classifies 28 tumor types and 50 tumor subtypes.
- In an independent validation of 2998 blinded samples, the molecular diagnosis was 87% accurate for main tumor type and 86% accurate for tumor subtype.

SAMPLE TEST REPORT



Interpreting CancerTYPE ID Test Results

MOLECULAR DIAGNOSIS

The [redacted] molecular diagnosis is the CancerTYPE ID prediction of certain tumor subtypes. It is reported probability (≥ 80%), the tumor is reported as "Indeterminate", in this case, the test report will also indicate tumor types that can be ruled out (see below) that cannot be excluded.

CAN NOT BE EXCLUDED

When applicable, tumor types on the CancerTYPE ID reference database that share some gene expression profile similarity to the patient's sample such that they cannot be excluded. Item diagnostic consideration will be listed here in rank order.

RULE OUTS

The CancerTYPE ID test report also lists tumor types that can all be ruled out with 95% confidence. In an independent validation of 2998 blinded samples, the rule-outs were 95% accurate. This may provide useful differential diagnostic information when two or more potential tumor types are suspected and one or more tumors may be ruled out in the rule outs.

Hotmail

From Wikipedia, the free encyclopedia

Hotmail (official), **Microsoft Hotmail**, previously **Windows Live Hotmail** and **MSN Hotmail**) was a free web-based email service operated by Microsoft as part of Windows Live which was recently replaced by the newer Outlook.com service by Microsoft. Hotmail was one of the first web-based email services.[3] It was founded by Sabeer Bhatia and Jack Smith and launched in July 1996 as "HoTMail".[4] It was acquired by Microsoft in 1997 for an estimated $400 million, and shortly after it was rebranded as "MSN Hotmail". The current version was released in 2011.[5]

Hotmail features unlimited storage, Ajax, and integration with Microsoft's instant messaging (Windows Live Messenger), calendar (Hotmail Calendar), file hosting service (SkyDrive), and contacts platform.[6] As of 2012, Hotmail was the world's second largest web-based email service after Gmail with 360 million users.[1][7] It is available in 36 different languages.[8][9]

Hotmail is developed from Mountain View, California. When Hotmail Corporation was an independent company, it was headquartered in Sunnyvale.[10][11]

On 18 February 2013, Outlook.com (a newer webmail service by Microsoft)[12] deprecated Hotmail.[13] Existing Hotmail customers are scheduled to be upgraded to Outlook.com during 2013.[13]

Prayer to St. Joseph over 1900 years old

O St. Joseph whose protection is so great, so strong, so prompt before the Throne of God, I place in you all my interests and desires. O St. Joseph do assist me by your powerful intercession and obtain for me from your Divine Son all spiritual blessings through Jesus Christ, Our Lord; so that having engaged here below your Heavenly power I may offer my Thanksgiving and Homage to the most Loving of Fathers. O St. Joseph, I never weary contemplating you and Jesus asleep in your arms. I dare not approach while He reposes near your heart. Press him in my name and kiss His fine Head for me, and ask Him to return the Kiss when I draw my dying breath. St. Joseph, Patron of departing souls, pray for us. Amen

Say for nine consecutive mornings for anything you may desire. It has seldom been known

to fail.

This prayer was found in the fiftieth year of Our Lord Jesus Christ. In 1500's it was sent by the Pope to Emperor Charles when he was going into battle

Whoever reads this prayer or hears it or carries it, will never die a sudden death, nor be drowned, nor will poison take effect on them. They will not fall into the hands of the enemy nor be burned in any fire, nor will they be defeated in battle.

Make this prayer known everywhere

Imprimatur

HIGH RISK CATEGORY

9.2% RISK[1] (95% CI: 5.7% - 12.6%)
OF D STANT RECURRENCE FOR ER+ LYMPH NODE POSITIVE PATIENTS FROM YEARS 0-10[1]

1 Risk of Re-current is based on analysis of 5 BCI Prognostic or molecular validation cohorts of patients with positive nodes and no known risk of systemic recurrence from years 0 to 10 who received chemotherapy and 5 years of adjuvant endocrine therapy. See below for additional details.

BCI Predictive

LOW Likelihood of Benefit

LOW LIKELIHOOD OF BENEFIT
FROM EXTENDED ENDOCRINE THERAPY[2]

BCI Predictive was developed and/or the included both N and LN+ study patients. However, the study was not designed or powered to assess LN benefit to endocrine therapy.

Test Description and Clinical Evidence
BCI provides two outputs based on a 23 gene expression (quantitative RT-PCR) signature: BCI Prognostic, and BCI Predictive.

BCI Predictive provides a prediction of likelihood o benefit from extended (>5 years) endocrine therapy (EET).[2] Patient results for this test may fall into either High Likelihood or Low Likelihood of Benefit. BCI Predictive is based on the HOPE 3J 17-plex assay established in the NCIC CTG MA.17 trial.[2,3]

BCI Prognostic for LN+ (1-3 positive nodes) provides an individualized estimate for a patient's risk for distant recurrence in the late (5-10 years) and early (0-5 years) interval. Prognostic for LN+ patients (1-3 pos ave nodes) is based on the eight gene combination of the BCI gene signature as well as other standard clinic-pathologic BCI prognostic factors. The patients were treated with tamoxifen and chemotherapy.[1]

Intended Use & Limitations
The Breast Cancer Index (BCI) Risk of Recurrence & Extended Endocrine Benefit Test is intended for use in patients diagnosed with estrogen receptor-positive (ER+), lymph node-negative (LN-) or lymph node positive (LN+, with 1-3 positive nodes) early-stage, invasive breast cancer, who are at distant recurrence. The BCI provides: 1) a quantitative assessment of the likelihood of both late (post-5 years) and overall (0-10 years) distant recurrence following an initial 5 years of endocrine therapy (LN- patients) or 5 years of endocrine therapy plus adjuvant chemotherapy (LN+ patients), and 2) predictions of likelihood of benefit from extension (5+ years) of endocrine therapy. BCI results are adjunctive of the treating physician's workup. Treatment decisions made in consultation with all other clinical findings. This test was developed and its performance characteristics determined by Biotheranostics, Inc. It has not been cleared or approved by the U.S. Food and Drug Administration. The test is used for clinical purposes. It should not be regarded as investigational or for research. How this information is used to guide patient care is the responsibility of the physician. Biotheranostics is certified under the Clinical Laboratory Improvement Amendments of 1988 to perform high complexity clinical laboratory testing.

AN/ALQ-136

The AN/ALQ-136 CMS is an airborne, automatic, electronic radar jammer designed to defeat/degrade the tracking capability of hostile threat pulse radar. When threat signals are identified and verified, jamming automatically begins and continues until the threat radar signal is no longer detected. The CMS then ceases jamming but continues to receive and analyze radar signals. The AN/ALQ-136 CMS is programmed to respond to the pulse radar signals of the most critical threat weapon systems anticipated to be encountered in the hostile environment.

The **AN/ALQ-136(V)1** CMS used on on the AH-1F attack helicopter consists of one receiver/transmitter (RT) assembly and two identical antennas. The operator control unit designed to operate both the AN/ALQ-136(V)1 CMS and the AN/ALQ-144(V)3 or AN/ALQ-144A(V)3 infrared (IR) jammer is provided as part of the AN/ALQ-144(V)3 or AN/ALQ-144A(V)3 IR jammer. A plenum assembly (S/N 5865-01 195-0857), used to assist in the air cooling system on the AH-1F helicopter, is connected to the rear of the RT. The total system weight is 47.4 pounds.

The **AN/ALQ-136(V)2** CMS is designed for the Special Electron ics Mission Aircraft (SEMA) and the Special Operations Aircraft (SOA) -- RC-12, MH-47E MH-60K, EH-60A. The CMS is programmed to respond to the pulse radar s gnals of the most critical threat weapon system anticipated to be encountered by SEMA and SOA in a hostile environment. It can operate against multiple threat weapons systems simultaneously. It has programmable modules, covers a broader frequency range than the (V)1 CMS and has bu lt-in preplanned product improvement capabilities. The AN/ALQ-136(V)2 CMS consists of three types of line replaceable units (LRUs). These LRUs include one receiver/transmitter (RT) assembly, one control indicator assembly and four antennas. The RT assembly utilizes state-of-the-art gnus array and gallium arsenide lightweight circuit boards. The total system weight is 72 pounds.

The **AN/ALQ-136(V)5** CMS used on the AH-64A/D consists of one receiver/transmitter assembly and two different antennas. The operator control unit, designed to operate both the AN/ALQ-136(V)5 CMS and the AN/ALQ-144(V)3 or AN/ALQ-144A(V)3 infrared (IR) jammer is provided as part of the AN/ALQ-144(V)3 or AN/ALQ-144A(V)1 IR jammer. The total system weight is 47.4 pounds.

***Abstract* — Due to the traditional separation of radio and IP engineering in 3G cellular networks, the subscriber access-request rate from the Radio Access Network (RAN) is usually a known parameter to radio engineers, whereas the corresponding *Authentication, Authorization, and Accounting (AAA)* traffic rate generated by the Network Access Server (NAS) in response to the RAN requests is un known. To bridge this design gap, we analyze a typical NAS-AAA system architecture based on the RADIUS protocol, the de-facto protocol for authentication and billing adopted by the telecom industry. We present the first analytical model for the mean and the variance of the AAA signaling rate and verify it by simulations. The model results can help operators to accurately configure their NASes with proper *Accounting-Interim-Interval* values as a tradeoff between network cost and accounting reliability**

I INTRODUCTION

In today s 3G networks, each subscriber's data session may result i several Authentication, Authorizat on, and Accounting (AAA) messages. Typically users are authenticated when requesting a serv ce and only after successful authentication they are authorized to acquire the service. Once the user is granted access, the network generates accounting messages based on the user's activity. As shown in Figure 1 when a user requests access to the Radio Access Network (RAN) an access request is generated by the Network Access Server (NAS) for u ng the Packet Data Serving Node (PDSN) in 1xEVDO networks. Upon successful authentication an *Accounting-Start* message is sent by the NAS to the AAA server. *Accounting-Interim* messages are period cally transmitted during the user's session and upon te rmination an *Accounting-Stop* message is sent.

The Remote Authentication Dial In User Service (RADIUS) protocol [1,2] is one of the widely implemented protocols in telecommunication environments for AAA functionality. RADIUS follows a client/server model and offers reliability over the unreliable user Datagram Protocol (UDP) by requi ng i response for each request. Although Diameter [3] was proposed by IETF to replace RADIUS for more security and rel ability most operators are still using RADIUS as most of the existing telecommunication equipment only supports RADIUS. In addition Diameter is also designed to interact with RADIUS via translation agents. Diameter and RADIUS are expected to co-exist in the foreseeable future and efforts are underway to make Diameter backwards compat ible with the existing RADIUS applications[3]

Due to the traditional separation of radio and IP engineering in 3G cellular networks, dimensioning and performance evaluation of RADIUS systems is usually estimated empirically i.e. based on laboratory measurements. This is due to the fact that there are currently no models to relate the RAN access rate to the outbound NAS RADIUS rate. This relationship, however is becom ng across rigly important. For operators such design guidelines for dimensioning AAA servers. Second operators lack a quantitative measure for configuring the *Accounting-Interim-Interval* parameter i.e. the number of *Accounting-Interim* messages sent during an active user session to minimize revenue losses if the NAS/the network suffers from unexpected hardware failures [2, 3 5]. This can be only accomplished if a sufficiently accurate relationship between the RAN and the RADIUS rates is found

Figure 1 A simplified diagram of a typical AAA system.

To address this issue we present the first analytical model that estimates the RADIUS rate given the RAN session setup rate. The model is fundamentally d ifferent from the existing research on RADIUS, which focuses primarily on security [6] or on the ity management aspects [7]. The results obtained are useful as not only to relate the outg oing access rate to AAA rate but also to quantify the design tradeoff between the resulting RADIUS rate and the level of accounting reliability i.e. set by the *Interim Interval*. We validate the model by simulations and draw conclusions on the practical sign ificance of the model results. Finally the model presented here w ll not only help in designing current RADIUS systems but it will also establish a better understanding of AAA traffic when deploying Diameter AAA systems in the future.

II BACKGROUND AND ASSUMPTIONS

This section derives an analytical model for the mean and the variance of the RADIUS messaging rate sent by a large NAS(s) (e.g see [8]) to an AAA server given the RAN user access rate. The following assumptions are used in the derivation process.

1. User arrivals requests (s) follow Poisson's distribution with mean arrival rate λ
2. The user session length (s) is negative exponentially distributed with a mean of (μ^{-1}).

The Institution Of Marriage

1. After a quarrel, a wife said to her husband, "You know, I was a fool when I married you."

The husband replied, "Yes, dear, but I was in love and didn't notice."

2. At a cocktail party, one woman said to another, "Aren't you wearing your wedding ring on the wrong finger?"

The other replied, "Yes, I am. I married the wrong man."

3. A man inserted an 'ad' in the classifieds: "Wife wanted." The next day he received a hundred letters. They all said the same thing: "You can have mine."

4. Marriage is the triumph of imagination over intelligence. A second marriage is the triumph of hope over experience.

Prayer to St. Joseph over 1900 years old

O St. Joseph whose protection is so great, so strong, so prompt before the Throne of God, I place in you all my interests and desires O St Joseph do assist me by your powerful intercession and obtain for me from your Divine Son all spiritual blessings through Jesus Christ Our Lord, so that having engaged here below your Heavenly power I may offer my Thanksgiving and Homage to the most Loving of Fathers O St. Joseph I never weary contemplating you and Jesus asleep in your arms I dare not approach while He reposes near your heart Press him in my name and kiss His fine Head for me, and ask Him to return the Kiss when I draw my dying breath. St. Joseph, Patron of departing souls, pray for us Amen

Say for nine consecutive mornings for anything you may desire It has seldom been known

to foil.

This prayer was found in the fiftieth year of Our Lord Jesus Christ In 1500's it was sent by the Pope to Emperor Charles when he was going into battle

Whoever reads this prayer or hears it or carries it, will never die a sudden death, nor be drowned, nor will poison take effect on them They will not fall into the hands of the enemy nor be burned in any fire, nor will they be defeated in battle

Make this prayer known everywhere
